

54" Tractor Shovel

X700 Series Tractors

54" Tractor Shovel
for X700 Series

Product Description

The 54" Tractor Shovel easily attaches to your tractor equipped with a 54" blade and dual hydraulic Quick Hitch or prior to Quick Hitch models that utilize the angling cylinder. The 54" Tractor Shovel takes the back breaking labor out of jobs like mulching, spreading gravel, ground grading, and more! Operation is easy because it uses the tractor's existing hydraulic controls. The angling cylinder is repositioned to open and close the shovel. Initial installation requires common hand tools, after which it is a NO TOOLS mount. A Hydraulic Cylinder Lockout Valve is not required, but will make opening and closing the shovel quicker if installed.

Additional Features

- 2.25 cu. ft. capacity
- 200 lbs load capacity
- Down-force allows for ground engaging work
- Blade can be used to doze, scrape, or level material with the Tractor Shovel installed
- Unique shovel design empties material completely
- Two layers of 1/8" thick steel from the bottom of the shovel provide upper and lower surfaces to capture the blade edge securely
- Utilizes front blade angling cylinder to raise the shovel when emptying materials
- Cutting edge is 3/8" x 3" abrasion resistant material
- Can be removed in 10 minutes or less after initial install
