

Snow Extension Kit

Fit 54-in. Front Blade

54" Front Blade with Snow Extension Kit Installed | LP53767

Product Description

Expand the width of a 54-inch front blade 30% by adding this pair of 9-inch extensions to lengthen the front blade to 72-inch width. The wider blade can be used for snow removal/clearing for larger driveways and even, commercial clearing. The Plow Extensions offer a quick and affordable way to increase the effective width of the front blade for snow clearing.

For use in the snow removal application on the X400/X500 HDGT's and X700's.

Features:

- Includes a left 9-inch and a right 9-inch extension
- Increases the overall plow width to 72-inches
- Independent and reversible cutting edge to ease in replacement and installation/removal
- Heavy-duty all steel construction for durability and long life
- Powder coated for rust resistance

Benefits:

- Reduce your plow time by adding 33% more width to the blade
- Gain full vehicle coverage when the blade is fully angled
- Will not interfere with spring trip, angling or lift
