## **BLUE SKY ESPRESSO**

Blue Sky Espresso is perfect for those who enjoy a rich, smooth cup of coffee. It's great for espresso, or filter coffee.

Intense, low acidity, with rich cocoa flavour.

Blue Sky Espresso consists of our current, in season coffees. This means in the summer to early winter, you'll have sweet, clean and balanced coffees from Honduras, Guatemala, El Salvador, Kenya, and Ethiopia. In the winter through the spring, you'll have southern hemisphere coffee represented - From Peru in South America, and as far away as Indonesia.

Here are the parameters that we've been using with our latest Blue Sky Espresso (parameters for an 18g VST Precision Filter Basket):

- 18 grams of freshly ground coffee
- Timer for 28 seconds
- Pull ~35-38 grams of liquid espresso
- Grouphead at 200° F
- 9 bars of pressure

For all types of filter coffee brewing, we recommend the following parameters:

- Brewing ratio: 1 g coffee 16 g water
- Slurry temperature (coffee+water): 195-200° F
- Extraction: 19.5-20.5%
