

Certificate of Conformance

This declaration of conformity is issued under the sole responsibility of the Manufacturer named FUSION Climb Company and declares that the following product:

Model: FP-8105-T-RED-SIL

The Eureka Triple lock Aluminum Carabiner is a lightweight and compact keylock locker designed for every day climbing missions. It features hot-forged construction, and a low profile, and can be used for belays and top roping. The carabiner is durable, reliable, and easy to handle, making it an essential piece of equipment for rock climbing enthusiasts.

- **Aluminum:** significantly lighter than steel and is therefore far more popular in the outdoor and climbing industries where weight is a major factor.
- **Screw Locking:** this gate is the most commonly used material in our Eureka Screw Gate Carabiner. To unlock or tighten, the sleeve must be manually loosened.
- **Auto-locking:** a carabiner uses an internal spring mechanism to not only close the carabiner but also lock the carabiner as soon as the gate is released.
- **Pin Nose:** a notch in the nose of the carabiner to maintain its structure and strength. This nose type is typically stronger.
- **HMS:** AKA pear shape—commonly used in belaying due to its shape.
- Major axis strength: 28 KN
- Minor axis strength: 11 KN
- Open gate strength: 8 KN
- Gate opening 1"
- Weight: 0.25 LB / 4 OZ
- Meets and exceed Standard: CE EN 12275
