

FUSION is your go-to manufacturer for the latest in handcrafted harnesses and innovative outdoor adventure products! We design & manufacture a wide variety of durable, affordable harnesses that will keep you safe and secure while you have fun traversing rock faces, for use on the job or for tactical purposes. We continuously improve our existing line and come up with new products that not only meet but exceed the safety standards (UIAA, CE/EN, ANSI).

HARNESSES

SELECTION & USE

STYLE OF FUSION HARNESS

FULL BODY

A full body harness is a holding device that the user wears to protect themselves from accidental falls. It minimizes the risk of injury caused by a fall by distributing the force of the fall over a large area of the body and keeping the subject of the fall upright and suspended. Body belts were previously used for fall protection, but were deemed unsafe and discontinued by OSHA in 1988 due to body belts causing internal injuries. Fusion full body harnesses come in two different styles; H-style and V-style.

H-STYLE

V-STYLE

HALF BODY

We offer various types of Half Body Harness that is easily adjustable at the thigh straps and shoulders. These are comfortable to wear and also easy to use. It helps to provide protection against safety falls, industry fall etc. Our products are made of the best quality plastic sourced from the most reliable vendors in the market.

HALF BODY

CHEST

Chest harness designed to be used with a seat harness. Safe and fully adjustable fast-pass buckles on the shoulders with polyurethane back plate to keep the harness together. Reinforcement loops for webbing so the harness can last longer where the carabiner clips in.

CHEST

SPECIALTY

We offer various types of Half Body Harness that is easily adjustable at the thigh straps and shoulders. These are comfortable to wear and also easy to use. It helps to provide protection against safety falls, industry fall etc. our products are made of using the best quality plastic sourced from the most reliable vendors in the market. V-PAD

WAIST PAD

Much like our shoulder pads, we offer waist padding in a variety of different options. Padded waist support can decrease user fatigue during prolonged usage. Lumbar support is also vital when carrying additional equipment or descending with heavier packs or loads.

FLAT BIG PAD

FLAT SMALL PAD

3D EVA FOAM PAD

2 PIECE WAIST PAD

LEG PAD

Optional leg padding provides yet another area to reduce user fatigue and increase comfortability.
