

ELEC-VAC ELECTRIC POWER BRAKE VACUUM MOTOR KIT

Our revolutionary Elec-Vac electric vacuum pump booster makes it easy to activate your breaking system without attaching to your engine inlet manifold vacuum system. The vacuum pump used in our kit is a Rotary Vane style pump which is 60% quieter than the noisy "Piston Style" pumps.

! IMPORTANT INFORMATION!
 Disconnect the battery before fitting.
 Always best fitted by a professional auto electrician.

Unit Installation

Our High Amp Vacuum Pump Relay Kit protects your Pump from overloads or voltage drops and is ideal for adding a manual switch.

Vacuum input spout to be connected to your brake booster vacuum tank

ELEC-VAC PUMP

Features:
