

USER GUIDE AND INSTALLATION MANUAL

HIDDEN NUMBER PLATE RETRACTOR KIT

Give your vehicle that extra clean look with an Retractable Number Plate Kit.

By Australian Law your Number plate must be visible while vehicle is in motion.

IMPORTANT INFORMATION!

Disconnect the battery before fitting.

Always best fitted by a professional auto electrician.

Unit Installation

- 1 Track Mounting**
Mount the license plate track and motor to the designated area using the bolt mounts (Diagram 1).
*Special Note - Extend the hose from the motor to the plate holder if needed.
- 2 Cutting Plate Bracket**
Make sure the license plate holder is flush with the object that it's behind. Cut away the metal that is below the plate holder mount. Measure out the length of where the license plate should be (Diagram 2).
- 3 Cutting Track**
Measure out that length from the top of the plate holder mount. Cut away the excess guide track (Diagram 3).
*Special Note - You can re-weld the top bolt mount if you have to cut below it.
- 4** Secure plate to track mount with 5/16 bolts, nuts & washers (Diagram 4).
- 5** Wire and test it.
