

With CX-1 a 43% Increase in Weight

Hollow Stems vs Solid Stems

ROI Calculations

CX-1 treated 1.26 dry tons

Non treated .83 dry tons

Digestibility

Non-Fiber Carbs (NFC)

Feed Quality

More Milk , Higher Constituents, Improved Animal Health

“My increase in forage quality (measured by sugars and starches) allows me to reduce the amount of shell corn I feed my cows from about 18 pounds a day to 12 pounds a day, 15 pounds for his heavy producers.” - Josh H
