

CX-1

LIFE IN A BOTTLE

SOIL BIOLOGY IN AN EASY-TO-USE LIQUID

Purple Cow CX-1 is a liquid biological concentrate that preserves and delivers diverse beneficial microbes for agricultural and horticultural applications. Purple Cow CX-1 stimulates growth and improves plant vigor and nutrient uptake. It may also improve tolerance against drought, salt, heat and stress. It is a biostimulant that accelerates microbial activity in the rhizosphere. All biology in Purple Cow CX-1 is naturally occurring with no synthetic or lab grown additives. Add CX-1 to provide a diverse buffet of biology for your plants!

“WE TRANSPLANTED AROUND 300 BEET PLANTS IN OUR HIGH TUNNEL THAT WE STARTED IN THE GREENHOUSE. I Poured A LITTLE CX-1 IN EACH HOLE AND I HAVE TO SAY I HAVE NEVER SEEN A PLANTING LOOK SO STRONG RIGHT OUT OF THE GATE. I AM EXCITED TO USE IT!”

TRUSTED BY PROFESSIONALS

Ingredients:

Contains Non-Plant Food Ingredients:

- Polynucleobacter necessarius.....7 x 10⁶ cfu/ml
- Opatutus species, GAS368.....5 x 10⁶ cfu/ml
- Pseudolabrys taiwanensis.....4 x 10⁶ cfu/ml
- Burkholderia sp.....3 x 10⁶ cfu/ml
- Cutibacterium acnes.....3 x 10⁶ cfu/ml
- Sulfuritalea hydrogenivorans.....2 x 10⁶ cfu/ml
- Methanotheroxobacterium soehngenii.....2 x 10⁶ cfu/ml
- Methylobacterium album.....2 x 10⁶ cfu/ml
- Lacunisphaera limnophila.....1 x 10⁶ cfu/ml

Inert Ingredients:

- Water based culture media.....99.99%

FREQUENTLY ASKED QUESTIONS

What can/should I use with CX-1?

- CX-1 requires activation from a food source. For best results, use with BioActive Supercharger, mix prior to application.
- CX-1 can also be dissolved with any biologically friendly fertility inputs.

Can I burn my plants with CX-1?

- While the beneficial biology in CX-1 will not overwhelm your plants, the increased nutrient efficiency means your plants won't need the same quantity of nutrients. We recommend cutting back on other fertilizer use by 15-25% and assessing from there.

How should I apply CX-1 to my garden?

- CX-1 is easy to use! Just mix with BioActive Supercharger, pour into your watering can, and dilute with water!

How much should I use? How often?

- For home gardeners, we recommend this recipe:
 - 2 TBSP CX-1 (appx 30 mL)
 - 1 TBSP BioActive Supercharger (appx 15 mL)
 - 1 gallon of water (appx 3.78 L)
- Pour directly in your watering can, and mix thoroughly to combine. Then, water your plants as normal! Apply once every 7-10 days for best results.

Grower's Tip: Cut the application in half for lighter feeding plants, and apply once every 3-5 days

"I'VE USED MULTIPLE PRODUCTS FROM PURPLE COW, AND AM ALWAYS IMPRESSED WITH THEIR COMMITMENT TO QUALITY AND SUSTAINABLE PRACTICES. IF YOU'RE LOOKING FOR HEALTHY AND ABUNDANT VEGGIES, GIVE THIS A SHOT!"

- Purple Cow Customer

General Indoor Use Recommendations:

1. Remember: a broad spectrum biological like CX-1 makes all other fertility inputs more available to the plants. Always test a small area with reduced fertility inputs to be sure the enhanced nutrient uptake is tolerable by your plants and dial back on existing fertility if necessary.
2. Apply CX-1 within 24-48 hours of combining with BioActive Supercharger
3. Store in a cool place out of direct sunlight
4. CX-1 is shelf stable for 12 months
5. Do not freeze
