

Nutrient Density in Organic Corn
Production
Near Infrared Reflectance Spectroscopy
(NIR)

Test weight up 3%
Protein up 15%
Methionine up 7%

For livestock producers ADG (Average Daily Gain) is critical and on a per pound basis
“Protein supplementation is the most expensive nutrient addition to the diet” – Fisher & Smith.

Proteins, Vitamins, Enzymes, Amino Acids, Oils & More

The Plant Nutrients AKA Primary & Secondary Metabolites that are more prominently produced

when minerals are synthesized by microbes.

Another reason why **CX-1** is a valuable addition to any **conventional or organic** liquid fertility mix.
