

**Nitrogen Fixation-** Conversion of **atmospheric nitrogen into ammonium**. Scientists leading the recent in-depth review of CX-1 at one of the premiere soil institutes in the country, were perhaps most impressed with the quantity and diversity of microbes in CX-1 that accomplish this.

### UW Nodule Comparison

**Soybean seeds inoculated with CX-1 grew almost 2 times as many root nodules as the control. UW Lab -Bill Hickey, UW Madison Professor of Soil Microbiology and Biotechnology – Fall 2016**
