Plant Selection Worksheet

Fast Growing Trees

By the end of this worksheet, you'll have:

✓ A plan for what plants you want to add, and where

✓ A plant shopping list

✓ Care requirements for each plant

Yard Location

Write the different areas of your landscape in the first row of the table. Sort your categories by sunlight and soil conditions, and add more columns if you need them! (Ex. full sun and dry soil, or partial sun and moist soil).

As you find plants you like, fill in the table below in the area you'll plant them. This will help you make sure you have a variety of colors, textures, shapes and heights in each area, and have a cohesive design across your landscape. Refer to your Landscape Design worksheet to help visualize plants in your landscape.
