

## Bezzera Victoria Red 3 Group Espresso Machine BZVICTORIA3R

### Quick Overview

Heavy Duty Multi-Boiler Technology. Victoria coffee machine system meets the request of the Worldwide coffee industry evolution; the triple boiler system allows to program accurate temperature setting while the brewing profile system allows to program pressure profiles to get the best from single origin and from sophisticated coffee blends from all over the world.

Â

- Heavy duty multi-boiler technology
- Multi-boiler system
- TFT display programming
- Patented brewing profile system
- Automatic water regeneration
- Coffee temperature control
- Available in red and White models

### Description

Our Espresso Machines are carefully designed to meet every product's brewing capacity, with a modern and stylish touch—perfect for your kitchen!

#### Main Technical Features:

- Multi-boiler system. The ultimate production capacity in the right moment: Victoria system is equipped with 3 independent boilers with dedicated On/Off switch: left steam output boiler, right steam and hot water output boiler, and each brew unit has its own coffee boiler, a special program connect the 2 main steam boilers in order to get a non-stop steam generator.
- TFT display programming. The programming is done through state of the art touch displays, that by a dedicated human interface allows to easily program the machine parameters, using pre-set profiles or giving the maximum customisation opportunity.
- Patented brewing profile system. Using BEZZERA pressure profile patent is possible to brew drip coffee and herbal infusion with dedicated low pressure programs. The double boiler hydraulic system is drawn by a Volumetric dosage that allows to set pressure profiles from 3 to 11 bar to maximise the coffee extraction experience. Using BEZZERA pressure profile patent is possible to brew drip coffee and herbal infusion with dedicated low pressure programs.

- Automatic water regeneration. In order to keep ph and water quality under control the automatic regeneration system of Water and Steam boilers allows to schedule a daily recycling.
- Coffee temperature control. The new coffee extraction temperature control system by PID thermostat, allows an accurate programming of the coffee temperature in the cup, thanks to the hydraulic circuit thermo stability the exaltation of the aromas of each type of coffee is granted.

Additional Information:

- Boiler Capacity: 2x6 + 3x1L
- Colour: Red

Warranty: 1 Year Parts Only
