Astaxanthin By Micro Wholefoods

ANTIOXIDANTS + ANTI-INFLAMMATORY

Experience the remarkable power of nature with Micro Wholefoods All Natural & Organic Astaxanthin Powder 100g. Derived from freshwater microalgae (Haematococcus pluvialis) and the yeast fungus Xanthophyliomyces dendrorhous, this blood-red pigment is a true gift from the earth.

Astaxanthin is a potent antioxidant with far-reaching health benefits. Unlike other antioxidants like beta-carotene, zeaxanthin, and vitamins E, C, D, and selenium, astaxanthin never turns into a pro-oxidant within the body. This means you can enjoy its powerful effects without any concerns.

Harnessing the power of astaxanthin, our product offers exceptional antiinflammatory properties and provides effective pain relief. By reducing the inflammatory compounds that underlie various chronic diseases, astaxanthin stands out as a natural alternative to prescription analgesics.

Embrace the goodness of Astaxanthin powder and unlock a world of vibrant health and well-being.
