

# 100% PLANT-BASED E3Enzymes<sup>®</sup> Supreme

## NUTRIENT ABSORPTION

E3Enzymes Supreme Enhanced with E3AFA is Refractance Window dried. It helps break down fats, proteins, and carbohydrates in our food, allowing nutrients to be extracted, absorbed and carried through the bloodstream to the organs and cells of the body.

Cooked food is devoid of digestive enzymes and therefore stimulates our body's internal enzyme secretion. This puts a tremendous strain on other digestive organs, enlarges the liver and the pancreas, and sets the stage for degenerative diseases that work quietly over many years.

Uncooked food is rich in digestive enzymes and only stimulates a small amount of your body's enzyme secretion. Since less stomach acid is secreted, raw food remains longer and digests better in the upper stomach.

***Pop plant-based enzymes before each meal to improve digestion and feel fabulous. This trick can help you become a digestive superstar and tackle the day with ease.***
