

DR COFFEE MINIBAR-S

DAILY

Deep Milk Clean

Put 50ml of 'Milk Frother Cleaner' in a 'Water Jug' filled with approx 500ml of 'Water'

Remove 'Milk Tube' from 'Milk Carton'. Direct tube into 'Water Jug'

Press & Hold 'Menu' ≡ Wait for the 'Beep' or screen change

Press & Hold 'Milk Rapid Rinse' to enter 'Deep Clean' Follow the on-screen prompts pressing 'OK' to confirm

When directed, 'Rinse' 'Water Jug' thoroughly. Fill with approx 500ml of 'Fresh Water' and continue

Replace 'Milk Foamer'. Soar old foamer in Jug of 'Hot water' of 24+ with one 50ml of 'Milk Frother Cleaner'
Note: 'Rinse' 'Milk Foamer' thoroughly with 'Fresh Water' before re-inserting

Once finished, 'Empty', 'Rinse' & 'Dry' 'Drip Tray', re-insert into machine

Quick Tips

Sensors:

Check metal sensors on 'Drip Tray' are dry & clean

For periods lasting longer than '24h' where coffee machine will not be in use, please switch machine off after 'System Clean'

Check Power-Cord and switch's

Check all attachments are connected correctly

Check Milk Hose is in Milk Container
