Steam Distillation

Plant Part

Leaf

Main Constituents

A-pinene, B-pinene, Eucalyptol, alpha-terpineol

Description

Eucalyptus has a cooling effect on the body, helping with fevers, migraine, and other respiratory issues. Because of its specific chemical constituents, Eucalyptus is the perfect oil to aid in clear breathing and open airways and can also be used in a calming, soothing massage. It soothes inflammation and acts as a warming oil when used for muscular aches and pains. The purifying properties in Eucalyptus are very beneficial for the skin and for cleaning surfaces as well as the air. Eucalyptus also aids in releasing tension and is often found in mouth rinses to help freshen breath and aid in oral health.

Uses

- Use as a warming oil for muscular aches and pains, rheumatoid arthritis, sprains, and poor circulation
- Add one drop to skin moisturizer and apply for energizing and uplifting benefits
- Combine with citrus oils or peppermint and water in a spray bottle to clean surfaces in your home
- Add to your skin care regimen for burns, blisters, herpes, cuts, wounds, skin infections, and insect bites.
- Diffuse for respiratory problems

Properties

Antiseptic, Astringent, Deodorant, Diuretic, Sedative and Vasoconstrictor
