

Guna[®]-Collagen

sterile ampoules

Beauty Medicine

Anti-aging & Wrinkles

Description

Cosmetic ampoules in a sterile solution for wrinkle treatment manufactured by Guna S.p.a.- Milan - Italy, according to the GMP. **Guna[®]-Collagen** is a low-dose animal collagen extract.

As the detoxification systems of animals are almost completely ineffective, their tissues and therefore their proteins are particularly toxic.

Therefore, the protein structure of Collagen extract acts directly on the targeted tissue.

The collagen extract preparation triggers the immune response of not only the entire RES system (hystiocytic macrophagic) but also of the targeted tissue and therefore promotes the neo-synthesis of the autologous collagen.

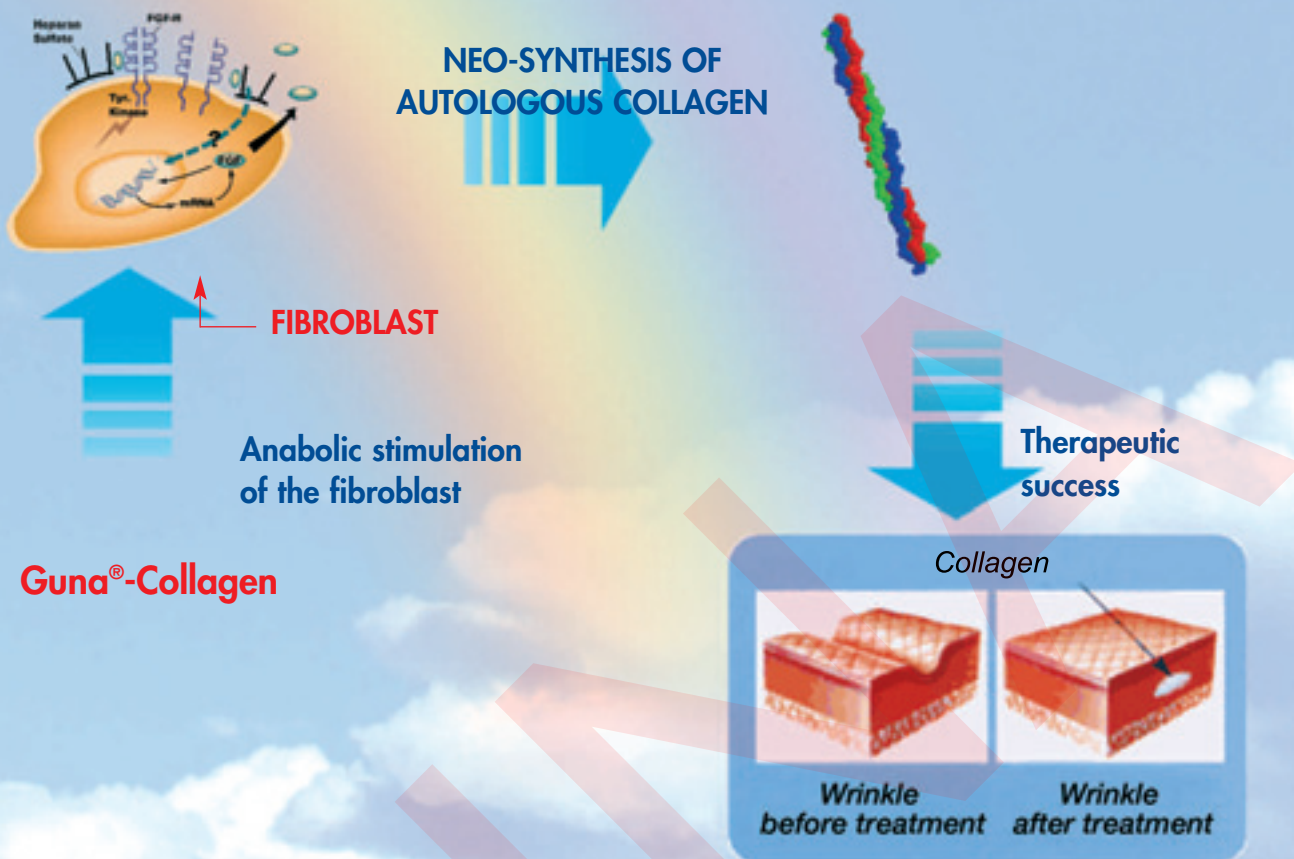

We can confirm that the use of Collagen extract causes a localized "microinflammation", which is sufficient to "waken" the functionality of the connective matrix.

The action of Collagen is also partly "trophic": its proteins, or some substances contained in them, are substrates for the enzyme reactions of protein synthesis ("codifying matrix"). The fact that they are diluted in accordance with the laws of enzyme kinetics, makes them perform as inducers, speeding up protein synthesis.

On the one hand, the immunological mechanism of **Guna[®]-Collagen** triggers the function of the loose fibrillar connective tissue of the dermis via a subclinical inflammatory process. On the other hand, it also carries out a trophic action by stimulating the fibroblast to secrete the autologous collagen.

Finally, the innovative characteristic of **Guna[®]-Collagen** is its double action of supplementation as well as of a real biostimulation of the production of the autologous collagen.

Guna®-Collagen

Uses

For face and neck wrinkles. Stimulation of connective tissue metabolism.

Ingredients

Collagen extract.

Directions

- Apply **Guna®-Collagen** and **Gel Beauty** to the skin by using magnetophoresis (**GUNAPHORESIS device**), iontophoresis, electroporation, ultrasound devices, etc.
- **Guna®-Collagen** can be also used with the micro-needling technique.

The standard protocol consists of 1-2 session/s a week for 8-10 weeks.

For long-lasting results, a maintenance therapy is recommended based on 1-2 sessions once or twice a year.

Most common combinations

Guna®-Collagen + Gel Beauty as a base for any cosmetic treatment to be mixed with:
+ Made®: wrinkles and skin revitalisation.

Packaging

Box of 10 x 2 ml ampoules.
Box of 50 x 2 ml ampoules.
