

How to Clean Lacquered Wood Flooring

Light Clean

For quick, light cleaning it is best to use the Microfibre Flat Mop. This will remove most of the dust that will collect on the floor and is quick and easy. You can also use a vacuum cleaner with a soft brush head.

Always clean along the length of the boards, never across the width.

Do not use a vacuum with a rotating brush if it has support bar underneath, as this can leave marks and scratches on the floor.

Routine Clean

MUST ALSO BE COMPLETED AFTER INSTALLATION OF PREFINISHED LACQUERED WOOD FLOORING

Once your floor starts to look a little dull, has markings or is soiled, then it's time to give it a Routine Clean. You can do this as often as you like, as the Blanchon Lagoon Cleaner is a gentle but effective cleaning agent.

(It is not recommended to do this a lot in a short space of time as you may over-wet the boards).

This simple process should be followed to keep your floor looking clean and like new. By using the professional cleaning products we supply, you can increase the longevity of your floor.

Step 1.

Complete a 'light clean' as directed above. Then Shake the spray bottle of Blanchon Lagoon well before moving onto step 2 below.

Step 2.

Using the Blanchon Lagoon, spray a small amount onto a small area of the floor (please note a 0.5L spray bottle can cover up to 200m², so it can be used sparingly). Wipe the sprayed area with the Microfibre Flat Mop.

Step 3.

Continue to clean the rest of the floor; working in small areas. If the floor is very dirty, it might be necessary to do several cleans.

DO NOT OVER WET THE FLOOR.

Step 4.

Allow the floor to dry before putting it into use, drying times are usually 10-15 minutes. Once dry, the floor can be put into full use.
