CS7510 InfiniBand Switch

324-Port EDR 100Gb/s InfiniBand Smart Director Switch

Mellanox provides the world’s first smart switch, enabling in-network computing through the Co-Design Scalable Hierarchical Aggregation and Reduction Protocol (SHARP)™ technology. The CS7510 system provides the highest performing fabric solution in a 16U form factor by delivering 64Tb/s of full bi-directional bandwidth with 400ns port latency.

SCALING-OUT DATA CENTERS WITH EXTENDED DATA RATE (EDR) INFINIBAND

Faster servers based on PCIe 3.0, combined with high-performance storage and applications that use increasingly complex computations, are causing data bandwidth requirements to spiral upward. As servers are deployed with next generation processors, High-Performance Computing (HPC) environments and Enterprise Data Centers (EDC) will need every last bit of bandwidth delivered with Mellanox’s next generation of EDR InfiniBand high-speed smart switches.

SUSTAINED NETWORK PERFORMANCE

Built with Mellanox’s latest Switch-IB™ InfiniBand switch devices, the CS7510 provides up to 324 100Gb/s full bi-directional bandwidth per port. The CS7510 modular chassis switch provide an excellent price-performance ratio for medium to extremely large size clusters, along with the reliability and manageability expected from a director-class switch.

CS7510 is the world’s first smart network switch, designed to enable in-network computing through the Co-Design Scalable Hierarchical Aggregation and Reduction Protocol (SHARP) technology. The Co-Design architecture enables the usage of all active data center devices to accelerate the communications frameworks, resulting in order of magnitude applications performance improvements.

WORLD-CLASS DESIGN

CS7510 is an elegant director switch designed for performance, serviceability, energy savings and high-availability. The CS7510 comes with highly efficient, 80 gold+ and energy star certified AC power supplies.

The leaf, spine blades and management modules, as well as the power supplies and fan units, are all hot-swappable to help eliminate down time.

COLLECTIVE COMMUNICATION ACCELERATION

Collective is a term used to describe communication patterns in which all members of a group of communication endpoints participate.
Collectives have implications on overall application performance and scale. CS7510 introduces the Co-Design SHARP technology, which enables the switch to manage collective communications using embedded hardware. Switch-IB 2 improves the performance of selected collective operations by processing the data as it traverses the network, eliminating the need to send data multiple times between endpoints. This decreases the amount of data traversing the network and frees up CPU resources for computation rather than using them to process communication.

**MANAGEMENT**

The CS7510, dual-core x86 CPU, comes with an onboard subnet manager, enabling simple, out-of-the-box fabric bring-up for up to 2048 nodes. CS7510 switch runs the same MLNX-OS® software package as Mellanox FDR products to deliver complete chassis management, to manage the firmware, power supplies, fans and ports.

---

**FEATURES**

**Mellanox CS7510**
- 16U modular chassis
- 36 QSFP28 EDR 100Gb/s InfiniBand ports per dual IC leaf blade

**Switch Specifications**
- Compliant with IBTA 1.21 and 1.3
- 9 virtual lanes: 8 data + 1 management
- 256 to 4Kbyte MTU
- 4x48K entry linear forwarding database

**Management Ports**
- DHCP
- Familiar Industry Standard CLI

**Indicators**
- Per port status LED Link, Activity
- System status LEDs: System, fans, power supplies
- Port Error LED
- Unit ID LED

**Fabric Management**
- On-board Subnet Manager supporting fabrics of up to 2048 nodes
- Unified Fabric Manager™ (UFM™) Agent

**Connectors and Cabling**
- QSFP28 connectors
- Passive copper or active fiber cables
- Optical modules

**Power Supply**
- Hot swappable with N+N redundancy

**Input range:** 180-265VAC
**Frequency:** 47-63Hz, single phase AC

**Cooling**
- Hot-swappable fan trays
- Front-to-rear air flow
- Auto-heat sensing fans

**Power Consumption**
- Typical power consumption (fully populated):
  - Passive cable: 4939W
  - Active cable: 6543W

---

**COMPLIANCE**

**Safety**
- CB
- cTUVus
- CE
- CU

**EMC (Emissions)**
- CE
- FCC
- VCCI
- ICES
- RCM

**Operating Conditions**
- Operating 0ºC to 40ºC
- Non-Operating -40ºC to 70ºC
- Humidity: Operating 10% to 85%, non-condensing
- Altitude: Operating -60 to 3200m

**Acoustic**
- ISO 7779
- ETS 300 753

**Others**
- RoHS-6 compliant
- 1-year warranty
