*height as measured from shoulder to heel W=width, L=length, G=girth

Dolls with measurements in the 'green zone' are dolls that can wear clothes sized for Curvy 1/3: adult proportioned dolls in the 60cm scale. Vinyl dolls tend to be taller than resin dolls, but the only real difference inseam. The exceptions to this are the extra-large bust options that are available in some dolls (indicated with +). Busts smaller than 25cm should be fine.

In the orange zone, (DDy, at one end, is too curvy, and regular SD, at the other end, is not curvy enough), some clothes will fit, but in general will be too tight at the bust, hip, or waist unless stretchy fabric is used.
