# Signal Blocking Key Hider

## #91801

Smart keys and smart key fobs constantly emit a signal looking to connect to a vehicle. The signal allows the doors to automatically unlock and the "Push to Start" button to work. The Signal Blocking Key Hider is designed for the many instances where you do not want to activate these features.

**NEXT  
GENERATION  
IN KEY HIDERS!**

### Hide Your Key

Pouch securely adheres to any surface, so you can safely store your spare key in or on vehicle while preventing RFID key fobs from automatically locking, unlocking or starting ignition.

- Hook and loop flap keeps key fobs securely inside pouch.
- RFID blocking fabric protects your car key fobs from wireless theft and automatic communication with vehicle.
- Includes key ring attachment to easily secure to bags, backpacks or key rings.
- Extra strong hook and loop system securely attaches pouch to prevent loss.
- Adhesive mounting pad sticks to any clean surface.

### Protect Smart Key Fobs

Prolong the battery life of your key fob and prevent accidental unlocking of vehicle, opening of trunk, or lowering of windows while the keys are in your pocket.

### Stop Car Thieves

Place keys inside pouch at home to prevent thieves from acquiring your wireless key fob signal and stealing your car.
