## Attachment Options

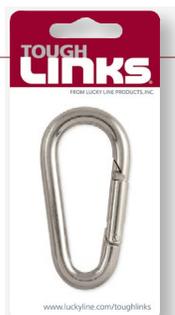

Round Eye	Swivel	Open Eye	Fixed Eyelet	Loop/Strap
<i>Reinforced eye provides more strength than swivel, and isolates the rope or cable that goes through the eye.</i>	<i>Eliminates tangling and allows for ease and flexibility of motion for attachments.</i>	<i>Use when rope/wire cannot be fed through eyelet opening. Designed to be closed with vice or hammer after attachment.</i>	<i>Fixed, or stationary, eyelets are stronger than a swivel and keep the rope or attachment in place.</i>	<i>Rectangular loop/strap openings allow for straps and webbing attachments to be fed through cleanly and allow for ease of attachment.</i>

## Interlocking Snaps LR

- Use as fasteners or quick attachment.
- Great for use with chain, rope and webbing of equal or lower working load limit.
- Use zinc-plated steel for basic corrosion resistance.

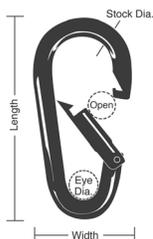

## Interlocking Snaps LR

- Use as fastener or quick attachment.
- Round edge isolates rope or other fittings.
- Great for use with chain, rope and webbing of equal or lower working load limit.
- Use zinc-plated steel for light to medium applications.
- Stainless steel provides superior corrosion resistance for heavy or outdoor applications.

## Oval Interlocking Snaps LR

- Use as fasteners or quick attachment.
- Great for use with chain, rope and webbing of equal or lower working load limit.
- Use zinc-plated steel for basic corrosion resistance.
- Stainless steel provides superior corrosion resistance for heavy or outdoor applications.

## Interlocking Snaps, Black LR

- Use as fasteners or quick attachment.
- Great for use with chain, rope and webbing of equal or lower working load limit.
- Resin coating helps to protect destructive elements from penetrating the metal.
- Use resin-coated products for added corrosion resistance.
