

Care instructions for your Flying Changes Garment

In order to enhance the longevity of your garment please follow our care instructions found on the label inside your garment carefully.

Here is a guide to the symbols used.

Almost all our garments are now fully washable on a delicate 30 degree or lower wash cycle. The most important stage is to ensure the garment hangs to dry naturally and should never be placed close to direct heat or tumble dried.

We recommend placing the coat in a large pillow case if it carries crystal buttons in order to prevent them banging against the drum.

All our wool coats are dry-clean only.
