

SYSTEM OVERVIEW

The Quantum Trader trades XBTUSD/BTC with an emphasis on minimizing risk. This algorithm trades six of our individual algorithms in an attempt to have a large number of uncorrelated algorithms trading concurrently, thereby smoothing out the equity curve in an attempt to provide more consistency in the returns. The Quantum trader utilizes three swing trading algorithms along with three-day trade algorithms which can enter positions either Long or Short, depending on market characteristics. When compared to other algorithmic trading systems, the quantum trader places fewer trades which helps contribute to the smaller drawdown seen in the back-testing.

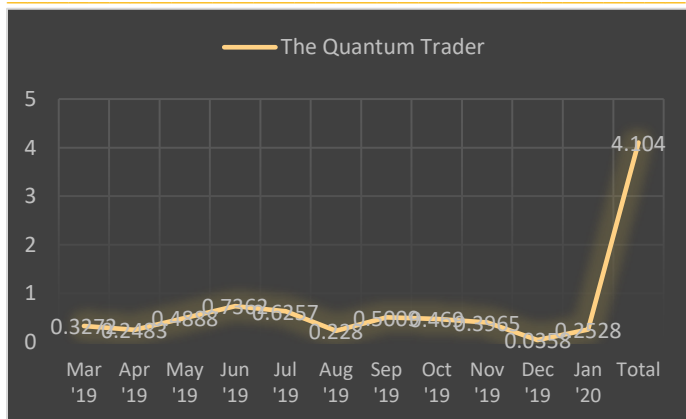

COMPANY OVERVIEW

Boss Indicators is a third-party trading system developer providing high quality quantitative trading systems which can be traded on your personal computer or through a VPS connected to AutoView. Boss Indicators is not registered with the NFA as a CTA, claiming the self-executing exemption from registration granted by the CFTC.
