25mm Day Dot Labels - Full Week Pack

- 1 roll each of Monday, Tuesday, Wednesday, Thursday, Friday, Saturday and Sunday 25mm food date labels. There are 1000 labels per roll. Used to ensure compliance in food preparation areas, they will not fall off food items when stored in the fridge or freezer which gives any kitchen / food preparation area peace of mind. They aid stock rotation and because of their design they can easily be seen for food preparation identification. Available in Permanent, Freezer and Peelable adhesives.
- The products we use in our labels is certified as safe to be used for Indirect or Direct Contact with Food, they are assessed and guaranteed compliant with the regulations set out by the BfR (Bundesinstitut für Risikobewertung) in Germany and the FDA (US Food and Drug Administration). Added to this the adhesive used is also guaranteed and has an ISEGA Certificate of Clearance as being food safe for Indirect or Direct Contact with Food.
- Adhesive Specifications.
- Peelable Adhesive.
- Acrylic-based adhesive – it has a good removability even after good initial tack, it is especially suitable for use on Cardboard, PE films and glass, however as this adhesive has ISEGA certification it is also safe to be applied directly to dry, moist and fatty foodstuffs.
- Tack.
- Medium tack, removable.
- Final Adhesion.
- Low tack.
- Temperature Ranges.
- Application temperature up to -25°C
- Temperature range -40°C to +60°C
- Permanent and Freezer Adhesives.

25mm Day Dot Labels - Monday - Friday Pack

- 1 roll each of Monday, Tuesday, Wednesday, Thursday and Friday 25mm food date labels. There are 1000 labels per roll. These date labels are used to ensure compliance in food preparation areas, they will not fall off food items when stored in the fridge or freezer which gives any kitchen / food preparation area peace of mind. They also aid stock rotation and because of their design they can easily be seen for food preparation identification. Available in Permanent, Freezer and Peelable adhesives.
- The products we use in our labels is certified as safe to be used for Indirect or Direct Contact with Food, they are assessed and guaranteed compliant with the regulations set out by the BfR (Bundesinstitut für Risikobewertung) in Germany and the FDA (US Food and Drug Administration). Added to this the adhesive used is also guaranteed and has an ISEGA Certificate of Clearance as being food safe for Indirect or Direct Contact with Food.
- Adhesive Specifications.
- Peelable Adhesive.
- Acrylic-based adhesive – it has a good removability even after good initial tack, it is especially suitable for use on Cardboard, PE films and glass, however as this adhesive has ISEGA certification it is also safe to be applied directly to dry, moist and fatty foodstuffs.
- Tack.
- Medium tack, removable.
- Final Adhesion.
- Low tack.
- Temperature Ranges.
- Application temperature up to -25°C
- Temperature range -40°C to +60°C
- Permanent and Freezer Adhesives.
