# SOLVENT-FREE SAFE & ECOLOGICAL PARTS WASHER

Ocean  **Sunset<sup>®</sup>**  
The biological parts washer 3.0

## NEXT GENERATION BIOLOGICAL PARTS WASHER - PREMIUM VERSION

The **Ocean Sunset**® parts washer works through a combination of BlueLiquid® cleaning solution, non-toxic and non-flammable, coupled with BlueTablets® microorganism tablets, which break down dirt and continuously regenerate the cleaning bath. It is an **ideal, effective and economical solution** for all professionals concerned with protecting their health and the environment.

# GET RID OF SOLVENTS AND THEIR PROBLEMS

Traditional solvents continue to be used in workshops and garages to clean various parts, creating risks to the health and safety of operators. These products are **toxic, flammable and harmful to health** through contact or inhalation.

They are also the source of **environmental risks**: accidental spills and release of volatile organic compounds (VOCs).

They result in **constraints** regarding facility upgrades, elimination of waste and new solvents parts washing **regulations** which exist in many states.

Toxic

Flammable

Harmful to health

## A BIOLOGICAL SOLVENT-FREE PROCESS

The biological parts washer works with a BlueLiquid® pH neutral cleaning solution regulated at 100°F, that is **solvent-free, non-toxic and environmentally friendly**, and BlueTablet® microorganism tablets which break down dirt and continuously regenerate the solution. This process guarantees **effective cleaning**, with no residue on the parts, and helps **limit consumption, maintenance and waste**.

Ocean  Sunset®

### THE BIOLOGICAL PARTS WASHER

The ergonomic design of this washer offers various cleaning and filtration systems and a user-friendly control unit.

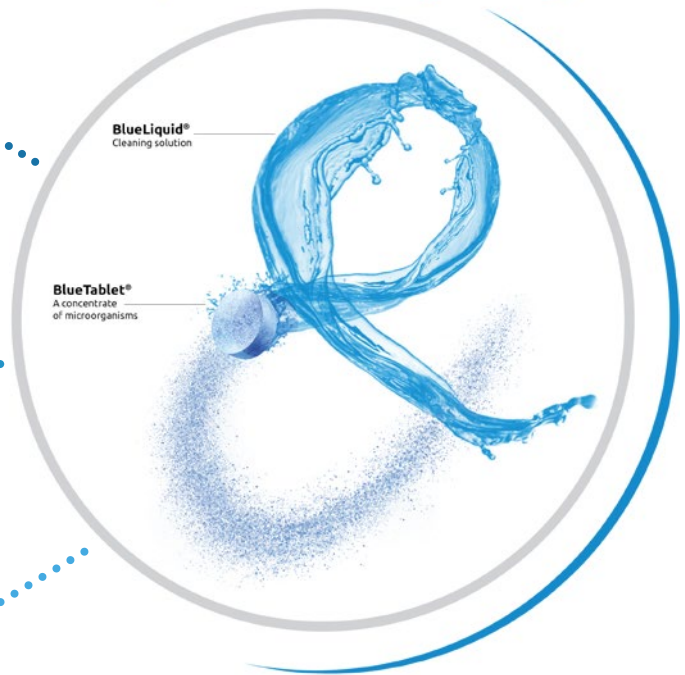

**BLUEREMEDIS® Technology**  
Keep constant cleaning efficiency

### BlueLiquid® CLEANING SOLUTION

An aqueous formula made up of specific, non-toxic and non-flammable surfactants that loosen and break down dirt.

### BlueTablet® A CONCENTRATE OF MICROORGANISMS

Biodegradation of dirt, continuous purification of the cleaning bath.

The addition of the tablet enables the solution to regenerate and ensures consistent quality of cleaning.

# THE BENEFITS OF THE BIOLOGICAL PARTS WASHER

**1 ENVIRONMENTALLY FRIENDLY & SOLVENT-FREE**  
 Non-toxic and non-flammable solution.  
 No risk for the environment, no VOC release.

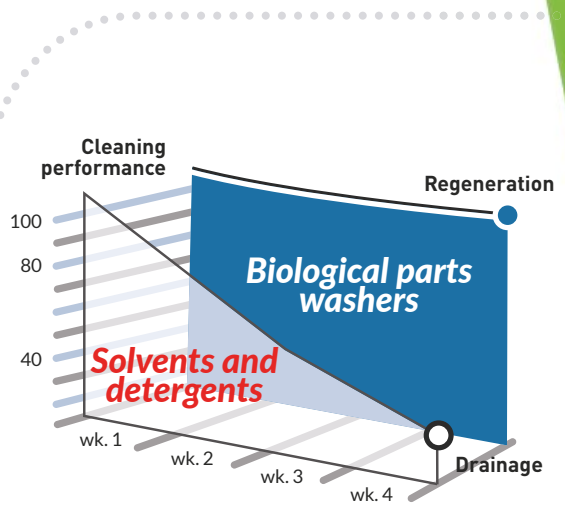

**2 EFFECTIVE**  
 Efficient cleaning, with no residue on parts. Consistent cleaning quality over time.

**3 ECONOMICAL**  
 No restrictions in terms of upgrading facilities. Limited maintenance, waste and reprocessing costs.

 <b>Solvents and detergents</b>	 <b>Biological parts washers</b>
 Repeated product replacement	 Regeneration by the tablet
 Consumption and maintenance	
 Waste and reprocessing	

**Minimises maintenance and waste**

# A SAFE AND USER-FRIENDLY SOLUTION

## ERGONOMIC & EASY TO USE

**HERMETIC LID**  
 > Limits evaporation of the solution.

**USER-FRIENDLY CONTROLS**  
 > Digital screen with Boost mode and Eco mode, tool-free interchangeable control unit.

**CLEANING AND SOAKING SINK**  
 > Retractable brush and flex spigot, large sink for soaking parts for tough cleaning.

**EASY MAINTENANCE**  
 > Drain tap, reusable 100 µm cartridge filter.

## TECHNICAL SPECIFICATIONS

Parts washer dimension	L 36" × W 26" × H 44"
Working area dimension	L 31" × W 16" × H 7"
Empty weight	88 lbs
Tank capacity	26 gal
Soaking area volume	8 gal / Soaking Height : 3.5"
Pump flow	300 gal/h
Heating power	1 kW
Power supply	115 vac. - 1.1 kW - 9 Amps
