

Light Duty Tumbling Blast Cabinet

Scan the code to see the unit in action!

MODEL T-14

The T14 is a semi-automated tumbling blast cabinet. The parts basket is welded steel and has arms that help tumble parts equally during the process.

The parts basket has a weight capacity of 24 pounds and easily loads and unloads. The 14 CFM blast system is activated when the window is closed and the timer is turned on.

The basket features ridges that help turn the parts over as they are blasted. It also has small perforations that lets media and debris fall out, but not parts!

Our headquarters is in Michigan and we proudly label our products Made in the USA. Our customer service is ready to help you before or after a purchase.
