2 Ton Air Bladder Jack

ESCO #92040 (2-Stage)

ESCO #92041 (3-Stage)

PRO
SERIES

WARNING:

THIS PRODUCT, AS WELL AS ALL TIRE TOOLS, SHOULD NEVER BE USED BY PERSONS UNLESS THEY HAVE BEEN TRAINED PROPERLY ACCORDING TO OSHA REGULATIONS 29CFR 1910.177 ENTITLED "SERVICING SINGLE-PIECE & MULTIPIECE RIM WHEELS".

FOR THE SAFE USE OF THIS PRODUCT, PLEASE READ INSTRUCTIONS. FAILURE TO DO SO CAN LEAD TO A VOID IN WARRANTY OR SERIOUS INJURY. PLEASE USE THIS TOOL AND OTHER TIRE SERVICE TOOLS WITH THE UPMOST SAFETY PRECAUTIONS.

CAUTION

Before using the product, carefully read the instructions manual and all stickers and warnings noted on the product. This is necessary to avoid injury to the operator and damage to the product.

Product Description

The Model #92040 & 92041 are professional 2 Ton Air Bladder Jacks. The ESCO Bladder Jacks are ideal for tire technicians and bodywork shops. Recommended for Automotive and small SUV/Trucks (consult vehicle user manual for vehicle weight and specifications for lifting).

Product Specifications:

Model # Description	92040 2-Stage	92041 3-Stage
Capacity	2 Ton (4,000 lbs.)	2 Ton (4,000 lbs.)
Working Air Pressure	100-145 PSI	100-145 PSI
A (Min. Height)	4.5 in. (115mm)	7.9 in. (200mm)
A+B+C (Max. Height)	17 in. (430mm)	22 in. (560mm)
B (Lifting Height)	9.25 in. (235mm)	11.8 in. (300mm)
C (Extension Height)	3 in. (80mm)	2.25 in. (60mm)
D (Width)	10.4 in. (265mm)	9.8 in. (250mm)

MAINTENANCE

1. Clean the outside of the jack with a dry, clean, soft cloth and periodically lubricate the air valve with a light oil in normal service.
2. When not in use, store jack in a dry location with the bags fully lowered.
3. Before each use, check all parts. If any part of the jack is damaged or suspect, remove the jack from service and contact ESCO for any repairs.

SAFETY INFORMATION AND DISCLAIMER

To avoid personal injury or property damage while using this product, read and follow all DANGERS, WARNINGS, CAUTIONS, and INSTRUCTIONS that are attached to, or included with, this product.

1. This product is designed and made only for lifting vehicles.
2. Never lift loads on sloping, uneven or soft ground.
3. The maximum load is 2 Ton. **DO NOT** exceed the rated capacity.
4. Air pressure must **NOT** exceed 145 psi (1 Mpa).
5. Keep jack clean for safe and best performance.
6. **DO NOT** adjust the safety valve.
8. **DO NOT** make any modifications to the jack.
9. **DO NOT** use the jack if damaged or have malfunction parts.
10. Be sure **NOT** to wear loose clothing or jewelry when operating jack.
10. Wear ANSI approved safety goggles when operating jack.
11. Only use the jack on a surface that is stable, level, dry and not slippery, and capable of sustaining the load.
12. Before starting lifting, it is necessary to block the vehicle by placing two wedges by the wheels, as shown on the label.
13. Make sure the vehicle lifting point suggested by the car manufacturer is stable and properly centered on the saddle.
14. After lifting the load it is absolutely essential to rest it on jack stands of adequate capacity. **DO NOT** work under load that is supported only by a jack.
15. ESCO cannot be held responsible for damage or injury resulting from unsafe use of the product; lack of maintenance; or incorrect product and system application.
16. Contact ESCO when in doubt about safety precautions or applications.

INSTRUCTIONS

Step 1: Connect Air Supply

Connect the air supply line to the air valve.

Step 2: Check For Leaks

Attach shop air line and check for leaks before use.

Step 3: Apply Emergency Brake and Wheel Wedges

Before lifting, apply the emergency brake and use wheel wedges to block all wheels to prevent any movement of the vehicle.

Step 4: Place Jack

Position the jack near desired lifting point.

Step 5: Raising The Jack

Press the "UP" button to raise the load to desired height. USE JACK STANDS with adequate capacity to support the load.

Step 6: Lowering The Jack

Raise load enough to carefully remove jack stands. Then SLOWLY and CAREFULLY lower the load by pressing the "DOWN" button.

Prompt, reliable service after the sale is very important to ESCO. ESCO maintains an in-house repair facility in Brooksville, Florida. To insure that our customers have as little down-time as possible, we offer a 1 day turnaround service. Our factory repair service is equipped with all the tools and machinery needed to repair your equipment quickly and affordably. Our trained technicians are the best in the industry. Not only do we service our own products, but we also service our competitors' products.

In addition to ESCO's 30 years of providing quality repair service, ESCO has reached out and partnered with more than 50+ hydraulic repair facilities across the US & Canada, to deliver quality repair and timely return of products. Visit www.esco.net or call 1.800.352.9852 to hear more about the newly added "Authorized ESCO Warranty & Repair Facilities" across the US.

If you have a bead breaker, ram, or hydraulic pump that needs repair, ESCO fixes your product with factory parts and guarantees the repair. In addition to servicing ESCO brand products, we also repair CP, IMT, Elrick, Branick, Goodyear, FEC, Ame Int., and Haltec lines of hydraulic bead breakers, rams, pumps, jacks, and many other hydraulic tire service equipment.
