Caution

Make sure no obstacles are in the desk’s path.
Make sure the desktop is not touching any walls.
Make sure all cords are appropriate length to accommodate the change in height.

WARNING
Pinch Point
Keep hands and fingers clear.

Keep children away from electric height-adjustable desks, control units and handsets. There is a risk of injury and electric shock.

Keep all electrical components away from liquids.

Do not sit or stand on the desk frame.
Do not crawl or lie under the desk frame.

Do not place any objects taller than 20" underneath the desk.

Do not open any of the components - the Legs, Control Box, or Switch.
There is a danger of electric shock.

This product is designed with a duty cycle of 10% (2 min. on, 18 min. off).

Liability

This height adjustable desk has electric motors and is designed for use in dry work areas only.

The desk height is adjustable so that it can be positioned at the most ergonomically suitable height.

Any other use is at user’s risk.

Under no circumstances does the manufacturer accept warranty claims or liability claims for damages caused from improper use or handling of the desk frame.

### Parts

#### TOOLS REQUIRED
- 4mm Allen Wrench (included)
- Phillips Head Screwdriver and/or Power Drill
- Tape Measure

#### COMPONENTS
- Side Bracket × 4
- Frame 1 × 2
- Center Rail × 4
- Frame 2 × 2
- Leg (Right) × 2
- Leg (Left) × 2
- Foot × 4
- Caster × 4
- Control Box × 2
- Beam × 2
- Screen Holder × 4
- Cable Tray Cover × 2
- Cable Tray × 1
- M8x12 Machine Screw × 4
- M6x14 Machine Screw × 8
- M6x10 Machine Screw × 44
- ST5x20 Wood Screw × 14
- ST5x16 Wood Screw × 4
- Handset × 2
- Power Cord × 2
- Cable × 2
- Cable Clip × 20

**Assembly Instructions**

**STEP 1**
Prepare the four legs (5 & 6) as shown in the picture below.

**STEP 2**
Using the supplied Allen Wrench, insert four M8x12 Machine Screws (14) to attach the Beams (10) to the legs as shown in the picture below.

**STEP 3**
Use 16 of the M6x10 Machine Screws (16) to attach the Frames to the Legs. Put the Center Rails (3) into the Frames as shown in the picture below.

*Please note that while the picture shows the table lift set flipped over, we do not recommend flipping it until Step 5*

**STEP 4**
Slide the Side Brackets (1) into the Frames. Use eight of the M6x14 Screws to attach the Side Brackets to the Frames.
STEP 5 (optional)
Insert four of the M6x10 Machine Screws into the holes of the Beams then assemble the Cable Tray as shown in the picture below.
*Please note that once you install the Cable Tray, the base width will be locked in that position. If you’d like to adjust the base width, skip to step 7*

STEP 6
Place the Cable Cover Tray (12) on top of the Cable as shown in the picture below.

STEP 7
Use 24 of the M6x10 Machine Screws to attach the Center Rails to the Frames and to attach the Screen Holders (11).

STEP 8
Use the ST5x20 Wood Screws to attach your two table tops (sold separately) to the assembled table lift set. Please ensure this is enough space between the table tops so they do not over lap one another.

STEP 9
Connect the Cables and attach the Hand Remotes to the table tops. Position them wherever you want.
Operational Procedure

Once your table lift is installed, operation is simple. Using the wired remote will allow full control over extending and retracting the lift columns. Use the up button to raise the table lift and the down button to lower the table lift.

You can program up to 4 locations using the memory setup: Use the up/down buttons on the remote to find your desired height(s), then press “M” followed by a number 1-4. The table height position is now saved. To move to the set position, hold the number button.

Reset Procedure

IMPORTANT
You must reset the desk prior to use:

To reset, press and hold the DOWN button on the Hand Remote (7) until the table lift reaches its lowest point. Release the DOWN button. Press and hold the DOWN button again until the LED display shows "RST". If you are not using an LED hand remote hold it for about 10 seconds. Release the DOWN button. Finally press and hold the DOWN button once more until the table lift lowers, slightly rises then stops. This signals the end of the reset procedure. Release the DOWN button and your table lift is now ready to use.

Troubleshooting

If your desk is not functioning it might need to be reset. Follow the RESET procedure.

If your hand remote has an LED display and it displays "RST" (reset), perform the reset procedure.

If the LED displays shows an error message ("Er1" - "Er13"), confirm that all wired connections are secure. Then perform the reset procedure.

If the LED remote displays "HOT", let the unit cool down for 20 minutes.

If the error message persists after the reset procedure, contact us at 1-800-676-6123 or sales@progressiveautomations.com.
