**ERD CALCULATION**

Due to the various different nipples on the market our published ERD numbers do not account for nipple height. To calculate ERD, the nipple head height \( \times 2 \) needs to be added to the listed number.

**EXAMPLE:**
R90 SL RIM ERD Listed as: **580++**

\[
580 + \text{(nipple head height)} + \text{(nipple head height)} = \text{ERD}
\]
