QUICK COMMUNICATIONS: the CALL24 UHF, VHF, 800 or 900 MHz DMR M-Series call box quickly connects to personnel on your radio system and establishes clear two-way communications. The large red push button is easy to use and once activated the call box will go to work improving co-worker and employee communications, quest services, deliveries, and safety - thus making your business more productive.

FREE TO USE: Best of all the CALL24 allows for unlimited usage, and free-airtime! With the M-Series Call Box there is NO hidden costs, No on-going fees, and No contracts to maintain. This will help you save thousands of dollars in operating expenses over the life of the product.

POWER OPTIONS: the M-Series DMR M-Series call box includes standard rechargeable battery power. The call box will need a continuous 110-120vac supply feed, however should call box supply volts be temporarily cut off the M-Series DMR will run for up to 24 hours on a single charge. Reliability you can count on!

ALL WEATHER PERFORMANCE: Come Rain, sleet, storm, or snow, our M-Series all weather enclosure will provide 24 hour a day performance. The M-Series remains on duty!

WIRELESS = CONVENIENT INSTALLATION: CALL24's Long Range Wireless Operation means you have greater flexibility for installing the M-Series where you need communications without having to bury new phone lines or replace old lines. No mess = fewer disruptions to your business operation!

MOBILE or DISPATCH: You can talk with the M-Series caller from a dispatch position or from any portable/mobile radio in your workforce. CALL24 meets the demands of today's diverse work force schedules.

PROGRAMMING: the M-Series wireless call box is delivered completely programmed for seamless integration into your radio system. With no network security risks or telephone switch assignments required, each CALL24 can be up and running in a few short hours!

GATE or LOCK RELEASE: CALL24's Need to remotely open an entrance gate or release an electronic lock? The M-Series radio callbox switch release option provides remote access control to service providers or employees needing access to restricted areas. Why walk all the way to a gate when you can open it remotely using an employee's portable control radio?

CALL24 Models:
MAU-DMR, MAV-DMR, MA8-DMR, MA9-DMR
