

- Clinically shown to promote safe removal of environmental toxins and toxic metals from the body*
- Supports healthy detoxification*
- Vegetarian/Vegan Safe
- Gluten Free
- Non-GMO

PectaClear® Environmental Toxin Cleanse*

60 Capsules

180 Capsules

PectaClear® Ingredients:

PectaSol-C® Modified Citrus Pectin
Algimate® Modified Alginate Complex

Other Ingredients:

Vegetable capsule (natural vegetable cellulose, water), stearic acid, magnesium stearate, microcrystalline cellulose, silicon dioxide.

PectaClear®

Environmental Toxin Cleanse*

What is PectaClear®?

PectaClear® is a blend of **PectaSol-C® Modified Citrus Pectin** (MCP), and **Algimate® Modified Alginate** Complex derived from kelp. This safe and gentle formula offers unparalleled support against the accumulation of environmental pollutants in the body, including lead, mercury, arsenic, radioactive particles, pesticides and other toxins.*

- Clinically shown to promote safe removal of environmental toxins and toxic metals from the body*
- Supports healthy detoxification*

Binds and Removes Environmental Toxins from the Body*

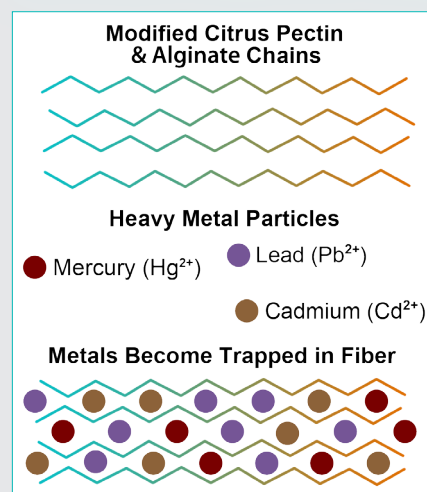

Sources of Everyday Toxins

Toxic heavy metals -- such as mercury, lead, arsenic, etc -- and environmental toxins -- such as pesticides, dioxins, mold toxins -- tend to bio-accumulate, meaning their concentration can build up in the body over time. Unfortunately, exposure to these "everyday toxins" is hard to avoid since they're found in our food, water, soil, household products and other common sources.

Safely Binds and Removes Toxic Metals and Environmental Toxins from the Body*

PectaClear® combines Modified Citrus Pectin derived from citrus peels, and **Algimate®** Modified Alginate purified from kelp seaweed, to safely bind and remove environmental toxins and toxic metals from the circulation and digestive systems.*

PectaClear® works gently and effectively to reduce toxic body burden, without removing essential minerals, which is a common problem with other heavy metal removal agents. **PectaClear®** also works to prevent reabsorption of toxins through the digestive tract, offering gentle, everyday support against accumulation of toxic metals and other pollutants.*

Supported by Research*

A 2007 published clinical study showed that **PectaClear®** removed toxic heavy metals such as lead, mercury and arsenic from the body, without affecting essential mineral levels. Additional research demonstrates the ability of **PectaClear®** ingredients to help remove environmental toxins and heavy metals, safely and gently.*

How It Works

In the body, pectin and alginates form stacks in what has been described as the "egg box model." The pockets of the "egg box" contain positively charged ions to balance the negatively charged chains. Normally, the positive ions are sodium and potassium. However, toxic metals -- especially lead, mercury, cadmium, arsenic and radioactive particles -- as well as other environmental toxins, have a higher affinity for these fibers, and become tightly bound and trapped within the egg box structure so the body can easily eliminate them.*

Manufacturing and Quality Control

PectaClear® is produced under conditions that meet or exceed Good Manufacturing Practices (GMP) as defined by the Food and Drug Administration (FDA).

Contraindications and Cautions

PectaClear® has no known adverse effects or toxicity with long-term use. Because dietary fibers have the potential to bind and may affect absorption, it's recommended that this formula be taken at least 30 minutes away from the intake of drugs or supplements. If you are nursing, pregnant or considering pregnancy, consult your healthcare practitioner prior to using this product.

How to Use:

As a dietary supplement, for intensive detoxification, take 3 capsules 2 times per day on an empty stomach. For long-term maintenance, take 1 capsule 2 times per day on an empty stomach, or as directed by your healthcare practitioner.
