

# TRIBUTE DISPLAY SYSTEMS & BUNDLES

## Usage and Configuration

Tribute Display Systems give you the flexibility to offer multiple configurations to your clients.

Use the QUICK LINKS in the first column in chart below to choose your preferred Tribute Display System Bundle and SAVE! The chart below identifies some of the configurations possible with each product. See Configuration and Usage Definitions below.

Each System (sold individually or as a bundle) offers you the ability to include the [SpotLight Battery Pack](#) in your bundle from the dropdown before you add to cart.

**\*Most Popular**

Definitions of suggested configurations and usage for the Tribute Displays.

- Tribute Stand-Alone / Scattered**

*(1 or more Displays)*

- Stand-Alone - Primary Focus of the Tribute at Visitation, Chapel or Grave-site.
- Use for Multiple Tributes Simultaneously *(if more than one display)*.

- **Scatter:** Use for the same Tribute to create different areas for individuals to congregate by separating the displays each with different content.

- **Tribute Display and/or Welcome Display**

*(2 Displays - 1 is the Tribute Briefcase)*

- In this scenario the larger display will serve as your primary Tribute Display and the Tribute Briefcase will serve to welcome guest to your Celebration of Life Tribute.

- The Tribute Briefcase Display is ideal to begin the journey for your guests and set theme for your Tribute. Serving as the backdrop for the guest registry, prayer cards, bookmarks, service programs and/or other items

- Keeping it simple is key. You may choose to light-up a significant framed photo prominently on the display with supporting photos, special sayings, or a poem alongside.

- **Tribute Displays: Side by Side Matching Displays**

*(2 Displays of the same size)*

- Put your honoree centered in prominence between the two matching displays by placing a large portrait photo, or urn on a pedestal surrounded by flowers. Tell their story on both sides for an elegant, expanded Tribute

- Use one display as your primary focus and the other to support special interests, social time with family and friends.

- **Tribute Displays: Side by Side 2-Tier or 3-Tier**

*(2 or 3 Displays)*

- Allow your guest to stroll through the journey!

- Set-up the largest display as your primary focal point sharing the journey, spotlighting the urn, photo, and flowers.

- Use the smaller of the two displays to expand the Tribute to include special interests, passions, and shared experiences with family and friends.

- For 3-Tiered configurations, your build up to the largest display as the focal point or your Tier-down. This is determined on how you want visitors to flow through the Tribute and on your facility layout.

- Whether you begin or end with the smallest display, you can use it to provide guests an opportunity to fill out the registry, access prayer cards, bookmarks, or other significant themed items. They can leave a card in a secured box or add a note of remembrance for the family.

- Taking guest through a journey helps direct them on a path they can take during the Celebration of Life making them feel comfortable in this environment.

- **Tribute Displays: Tiered on 2 Sides with Center Focus**

*(3 Displays - Max + Double Deluxe)*

- A very elegant and prominent Expanded Tribute Option. The Tribute Max is set in the center as the focal point (with urn/photo etc. as the center focus). A Tribute Deluxe Display is set on each side of the Tribute Max. The overall length of this setup is 16 feet.

- Optional- For a consistent look you might also include the Tribute Briefcase, set-up separately to welcome your guests.

- **Tribute Display and/or Marketing Display**

*(Any Display)*

- Use one display as your Tribute Display and the other set-up in your lobby promoting your business products, services and your Tribute Personalization offering.
