

# THE CONNECTED SOLUTION

## TAKE CONTROL

The PowerTechCS App gives you real-time information about your PowerTech generator and/or vehicle. View and monitor all your generator's critical systems on a single, easy-to-use dashboard.

## MONITOR EQUIPMENT

Track your vehicle's location and set a geofence to be alerted if it moves. Control lights, A/C, and digital switching systems with the touch of a button by adding wired and wireless sensors.

## MANAGE LARGE FLEETS WITH THE WEB-BASED FLEET PORTAL

### GENERATOR DATA

Monitor generator information like voltage, current, and frequency. View charts displaying generator information and set rules to receive alerts via email or text.

### ENGINE CONTROL AND METRICS

Remotely start and stop your generator from almost anywhere in the world. Monitor your generator engine performance with charts and alerts.

### GPS TRACKING AND GEOFENCE

Track your generator and vehicle's location. Receive alerts when the vehicle breaches your custom geofence.

### PROTECT YOUR PROPERTY

Add entry and motion detection sensors to your vehicle or trailer. Set alerts to be notified if your property is at risk.
