

JGPL News September 2020

JGPL are the UK Stockists for Mersen EV and DC fuse ranges

MERSEN

With the growth of DC Battery related applications in EV and Hybrid Vehicles, comes the need for better operation, management and protection of such loads.

JGPL represent MERSEN who, specialise in equipment for Electrical Power Management covering market sectors from Industrial through to Aerospace and Automotive. Product lines include **Fuses and Surge Protection** equipment, **Heatsinks and Cooling**, **Capacitors** plus **Laminated Busbars** for Inverters, Battery Packs or high reliability power distribution.

MERSEN fuses for Battery Packs, Chargers and Electric Vehicles are fully qualified, covering 550V to 1000 VDC and from 5A to 600A+.

JGPL stock holding of EV and DC fuses

For Production, Development or Service requirements, fast delivery of fuses is essential.

JGPL stock a broad range of Mersen EV and DC fuses to support such needs with quick off the shelf delivery. Higher volume or production requirements can be supported with dedicated buffer stocks which can be called-off flexibly as required from our UK facility.

Please contact us if you have a requirement, need technical support or to discuss the other Products and Suppliers we represent in the field of Power Electronics www.jgpl.com
