# AIRWOOD

## FLOORING ACCESSORIES

### ABOUT OUR VENTS

Airwood vents are hand made and constructed of North American sourced select and better hardwoods. Natural wood characteristics such as mineral streaks, small knots, sap and grain variation are to be expected and are not considered a defect. Over time as the wood ages colour changes may occur such as lightening or darkening depending on the species, especially in its natural form.

Airwood warrants that all products shipped will be defect free and will have passed a 3-point quality control inspection. All Airwood vents are hand sanded so they are ready for pre-finishing right out of the box.

### STOCK

Most standard size vents in Red Oak, White Oak and maple are available in stock in  $\frac{3}{4}$ " thickness. Limited quantities of other standard size vents in various species and thickness are available but may require a slightly longer lead time. Please ensure you specify your thickness on your purchase order to ensure you receive the proper product.

### DAMPERS

All standard size  $\frac{3}{4}$ " thick Airwood Vents come with a sliding damping system at no cost. Please note that dampers are not available for thicknesses under  $\frac{3}{4}$  inch.

### SPECIAL ORDERS & FINISHING OPTIONS

Custom options are always available. We can accommodate custom sizes in our eggcrate design in both Flush Mount and Self Rimming styles. Clear coating in oil, low gloss or semi gloss finishes are also available. Email or call with your specific needs and we'd be happy to quote your order.

### DELIVERY

Orders for stock items are usually shipped within 5-7 business days. Custom orders or non-stocked species may require 7-10 business days. Lead times are always quoted at time of order.

6167 Don Murie Street, Niagara Falls ON, Canada, L2G0B1
