

“Nuance Dragon Medical One is an excellent product...”

“Without doubt, this is the best Medical Speech Recognition Software I have ever used.”

Dr Sanjay Shyamant | Church Street Medical

About Church Street Medical

Established in 1910 by Dr Elder, who set up the practice at No.22 Church Street, which after time moved across the road to 77 Church Street.

The Medical practice is now situated in purpose-built premises at the Devereux Centre in Barton Rd, opposite the Community Hospital.

As a forward thinking practice, throughout the years Church Street Medical have developed the services they offer and incorporated the latest innovative technology to support patient care.

Key Requirements

- Secure Patient Data
- Reduced turnaround time
- High levels of accuracy

The Solution

Dragon medical One (DMO)

The latest Cloud-based solution from Nuance

For all you non-typists out there; this is the answer - I will use this for the rest of my consulting days...

The most impressive thing was that the software recognised almost every single word I spoke on day one, without any errors at all. I have since 'trained' the vocabulary for a few local terms and abbreviations, but no need of training for complex diagnoses - Dragon knows them all.

Now that I have adapted my working style to use this software seamlessly, I would say it saves me between 30 minutes to 1 hour every day.

Dr Chris Renfrew | Church Street Medical

Patient Data Security in the cloud...

In addition to the core Microsoft Azure data centre security, Nuance is committed to an ever-advancing, defence-in-depth security strategy and corresponding controls intended to ensure that the healthcare data you entrust to Dragon Medical One (DMO) is kept private and protected.

DMO may securely connect via HSCN (Health and Social Care Network) into NHS organisations including hospitals and clinics supporting the high availability, business continuity and security demands for the NHS.
