SECTION 5: FIRE-FIGHTING MEASURES

In case of fire use and be aware of the following

Suitable Extinguishing Media:	Dry chemical, foam or carbon dioxide. Water should only be used to cool fire-exposed containers, structures and to protect personnel or to dilute and flush away from sources of ignition.
Unusual Fire and Explosion Hazards:	Closed containers may explode when exposed to extreme heat or fire. Vapours may concentrate in confined areas. Vapours may be heavier than air and may travel along distances to a source of ignition and flash back.
Fire Fighting Procedure	Wear full protective clothing such as heat insulating clothes and gloves, eye and face protection and respiratory protection. Self-contained breathing apparatus should be used when entering the hot zone. Remove any combustible material from the surrounding area where safe to do so. Start fire fighting from an up wind/wind ward direction. Only use the specified extinguishing media.
Products of Combustion:	Carbon monoxide, carbon dioxide, monomer vapours, toxic gases.

SECTION 6: ACCIDENTAL RELEASE MEASURES

General Measures:	Comply with all applicable health and environmental regulations. If necessary, evacuate all unnecessary personnel upwind/windward. Eliminate all sources of ignition such as heat, sparks, open flames and other combustible materials. Cordon area from accidental entry. Complete personal protective equipment must be worn during clean-up.
Small Spills and Leaks:	Use non-combustible, absorbent material such as sand, vermiculite and place into containers to dispose of properly.
Large Spills and Leaks:	Shut off leak if safe to do so. Dike and contain spill far ahead of liquid for later disposal. Pump to storage or salvage vessel (if quantity allows). Use absorbent material to collect excess residue. Keep salvageable material and rinse water out of sewers and water course.
