SURFACE PREPARATION
For any given paint system, surface preparation is the single most important factor which would determine its performance. Various surface preparation methods are adopted depending on the requirements of the paint system used and the condition of the surface of the substrate. The surface could be steel, galvanized steel, aluminium, concrete or wood. For each substrate, the surface preparation and treatment needed is different.

GENERAL SURFACE PREPARATION
All surfaces must be sound, dry, clean and free of oil, grease, dirt, mildew, form release agents, labile curing compounds and loose and flaking paint.

For products with **SELFRIME TECHNOLOGY™**, seek guidance from corresponding label/Data Sheet.

NEW SURFACES
Concrete and Masonry: If possible, allow curing for at least 30 days before painting. Remove any loose aggregate from the surface and roughen the surface of slick, smooth concrete by mechanical means or acid etching. Ensure to carefully follow the manufacturer's application and safety instructions. Rinse thoroughly with water and allow to dry. Prime with Harris/B-H Super Seal Bonding Primer/Sealer or Harris/B-H Super Grip Problem-Solving Primer or with Harris/B-H Ultima Concrete & Drywall Primer.
Wood: Spot prime knots with a knotting sealer. Sand the surface smooth and wipe clean. Prime surface with Harris/B-H Ultima Wood Primer or Super Grip Problem-Solving Primer.
Galvanised Metal and Aluminum: Prime with Super Grip Problem-Solving Primer.
Ferrous Metal: Apply a full primer coat of Rust Chem Red Oxide, Anchorlite Heavy Duty or Universal Primer to the entire area.

PREVIOUSLY PAINTED SURFACES
Wash and rinse thoroughly with water to remove any contaminants and allow to air dry. Remove all mildew by washing with a solution of 125ml liquid bleach and 15ml non-ammoniated liquid detergent per litre of water. Glossy areas must be sanded to a dull finish and wiped free of dust to provide best adhesion. Scrub heavily chalked or greasy areas with detergent and water and allow to air dry. Treat any remaining chalky surfaces with Harris/B-H Super Seal Bonding Primer/Sealer.
New Surfaces: Prime bare areas with primer specified under **NEW SURFACES**.

EXTREMELY LOW ODOUR AND BETTER AIR QUALITY
ULTIMA PLUS with EASYBREATHE TECHNOLOGY™ was formulated with your health and your environment in mind. Containing the lowest possible amounts of harmful volatile organic compounds (VOCs), and tinted with Zero-VOC colourants, ULTIMA PLUS lets you paint occupied spaces without worry.

LONGER TERM PROTECTION FROM FUNGUS AND MOLD
ULTIMA PLUS with MILDEWGUARD TECHNOLOGY™ has been formulated with unique micro-encapsulated biocides designed to release slowly over the life of the coating. Unlike most paints that lose their anti-mildew effectiveness within six months, ULTIMA PLUS will resist the growth of fungus and algae for much longer.

INDEPENDENTLY CERTIFIED TO BE ECO-FRIENDLY
ULTIMA PLUS products that display the GREENWISE® mark have been tested and certified as GREENWISE® by an ISO-accredited testing facility, which means that they meet or exceed the VOC requirements of LEED® and do not contain certain chemicals which have been determined to be harmful to humans or the environment.

Ultima Plus is available in a wide range of finishes, and in any colour. Choose from this colour card, our chip displays and fandecks, our competitors' colours, or bring in a sample, e.g. fabric, tiles, etc. for us to match with our cutting-edge technology. To assist your choice, visit www.ultimaplus.com and try out our online colour tools.

YOUR ULTIMATE PAINT SOLUTION

COLOURS

to match your mood

YOUR ULTIMATE PAINT SOLUTION

BRIGHTER COLOURS WITH STRONGER FADE RESISTANCE
ULTIMA PLUS with COLOURLAST TECHNOLOGY™ has been specially designed to withstand the harsh rays of the Caribbean sun. Formulated with UV absorbing extender pigments and tinted with high-performance colourants, ULTIMA PLUS will look brighter and last longer than conventional paints, so you don't have to repaint as often.

SUPERIOR COVERAGE AND EASIER APPLICATION
ULTIMA PLUS with COVERFAST TECHNOLOGY™ is a spatter-free paint made with a very high pigment concentration. When tinted with its powerful colourants, the result is better opacity, coverage and hide. This means that ULTIMA PLUS will take you less coats to reach full coverage, so you get the job done faster, using less paint.

NO PRIMER REQUIRED OVER MOST SURFACES
ULTIMA PLUS with SELFRIME TECHNOLOGY™ uses innovative cross-linking acrylic resins that allow it to bond to and seal many surfaces without priming first. Unless you need to paint chalky, glossy, metal or heavily-stained surfaces, paint directly with ULTIMA PLUS and save yourself a coat of paint – and your time and money.

How To Match Your Mood

Coordinate colours easily and with absolute confidence! Match Your Mood is our unique and easy-to-use colour system that takes the hassle out of choosing the right combination of colours. We've grouped our colours into four mood-inspired collections that are guaranteed to harmonize well – Fresh, Luxurious, Calm and Warm.

Colour Matching

Quick, Easy & Accurate! Now you can match any colour you desire at any of our Harris Colourcentre locations. Each location has a cutting edge spectrophotometer from X-Rite – The makers of Pantone, that can scan a wide range of samples and generate the perfect formula. Where do you find your inspiration? The colour of your new curtains, the shade of your favourite flower, or even the chip from another paint manufacturer. Our computer technology can find you the perfect colour in the ULtimate finish!

Colour Visualization

Sometimes seeing is believing! Have you come up with the perfect colour scheme for your home but you are still not sure? Visit www.championsofcolour.com to use our new colour visualization tool and virtually paint a photo of your home or one of our sample homes. Then you can print, save, email or share your photo with friends and family for their input!

Colour Champions

At Harris, we don't just sell cans of paint; we transform lives and spaces with colour! Each Colourcentre has a team of trained colour experts to help you coordinate and match colours for your home. We'll even store your records of your final purchase, making it easy for you when you are ready to repaint or touch up again.

Problem-Solving Technologies

It's not often that research and technology combine to create an innovation that revolutionizes an industry. Combining not one but five new problem-solving technologies in one can that give you brighter, more fade-resistant colours in fewer coats, are self-priming with lower odour and greater fungus-resistance.

Best by Test in quality, the new ULtimate Plus can be tinted to any colour, or custom-matched to the exact perfect shade.

Mediterranean Mist 0713

Salmon Mousse 1049 **Queen Anne's Lace 0558**

Calm colours create space in a room. Light and airy colours give a room that serene, quiet and peaceful feeling of nostalgia. A lighter colour adds a breezy quality to the space. It provides the feeling of freshness and radiance. Calm schemes work well in bedrooms, bathrooms and living rooms.

Calm

Cool, calm and sophisticated

Earth Happiness 0769

Honey Cream 0916 **Sand Island 0047**

Cherish is the Word 0029

Perfection 1245 **Pink Duet 0075**

Wildflower Prairie 1273

Kyoto 0657 **Bermuda Son 0797**

Pale Blossom 1029

Lush Meadow 0434 **Pastel Day 0166**

Back to Basics 0255

Ode to Joy 1137 **Berry Patch 1152**

Warm colours speak of nature. Muted shades of Reds, Oranges, Yellows and Greens resonate of the rustic, natural earth tones around us. These colours bring a level of sophistication and subtlety that create a perfect place to retreat to and relax. Warm schemes work well in living rooms, TV rooms and other areas used for relaxing.

Warm

Cosy and comfortable

Island Embrace 0398

Glistening 0813

Wonder Woods 0772 **Cut Velvet 1192**

Clean, pure and breezy are the colours represented in the fresh palette. Think Greens, Blues, and Yellows. Fresh colours are used to adjust the temperature in a room and work well in those rooms where there is lots of natural sunlight. Fresh schemes are suitable in bathrooms, kitchens and breakfast rooms.

Au Gratin 0969

Peeps 0857 **Cavern Sand 0165**

Rich, vivid and bold are the shades which make up the luxurious palette. These deep tones are able to create relaxing and embracing areas with dramatic atmospheres. Reds, Oranges, Deep Blues and Greens add that touch of class and luxury to any space. Luxurious schemes are used primarily on the exterior or as feature walls in a room.

Tile Green **Tile Red** **Terra Cotta**

Acrylic Porch & Patio Enamel

Suitable for high traffic areas, this versatile 100% water-based enamel can be applied to a wide variety of surfaces including porches, patios, floors, tennis courts and exterior ground sills, to create that perfect accent to your home.

Select Your Paint Sheen

FLAT
Beautiful matte coating, ideal for low-traffic interior/exterior areas. Best for hiding imperfections.

SATIN
Smooth finish with a subtle sheen. Washable and scrubbable. Ideal for bedrooms, bathrooms, hallways, and high-traffic areas.

GLOSS
Gloss is the highest sheen of paint available. It is a good choice for areas that sticky fingers touch — cabinets, trim, doors, and kitchens.

All sheens shown in Florida Waters 0599. Colours may vary based on light source and paint sheen.
