

COVID-19 Safe Work Practices Specifically for the Painting Industry

In these uncertain times, it is essential for professional painting businesses to modify their standard operating procedures to keep their employees safe and to protect homeowners, building occupants and customers.

These in-depth interactive training programs will assist painting businesses to build a comprehensive infection prevention/control program and disinfecting protocols to be implemented as painting businesses re-emerge from the shutdowns caused by the Coronavirus pandemic.

These courses cover the following areas:

- Identification of infectious pathogens and their transmission
- Introduction to Infection Prevention and Control (IPC)
- Risk Assessments and evaluation of painting trade related risks to the SARSCov2
- Safe work practices for employees and safe interaction with residents/occupants during interior painting projects
- Basics of an Infection Control Plan
- Principles of environmental cleaning , sanitizing and disinfecting
- Intro to State-of-the-Art disinfecting methods and equipment
- Proper Personal Protective Equipment and Respiratory Protection
- Disinfection Chemical Safety

We offer three levels of certification designed specifically for those in the painting industry and associated trades. A brief description of each of these certifications and who would best benefit from them are covered below:

On-Demand: Covid-19 Safe Work Practices for Infection Prevention and Control for Painting Professionals (pre-requisite for the 2hr and 6hr live webinars) **\$25**

This on-demand course offers an Awareness Level introduction into the basic principles of Infection Prevention and Control and how they apply to the professional painting industry.

WHO SHOULD TAKE THIS COURSE?

Anyone in the painting industry that functions in customer facing operations (retail/sales, estimates, residential /commercial painting, property management),

Live Webinar 2-hr : Covid-19 Disinfection Technician **\$65**

This course is geared specifically for any painting professional that will conduct more enhanced cleaning sanitizing and disinfecting.

WHO SHOULD TAKE THIS COURSE?

Any painting professional that will undertake more specific and directed approaches to sanitize and disinfect, work areas prior to painting, fleet vehicles, equipment and other critical areas.

Live Webinar 6-hr Covid-19 Infection Prevention and Control Management for Painting Professionals **\$150**

This level of training is tailored specifically for any painting professional or affiliated tradesperson that plays a critical role in the design, implementation and evaluation of an effective infection prevention and control program.

WHO SHOULD TAKE THIS COURSE?

Painting Managers supervisors and business owners.

COVID-19 Safe Work Practices Specifically for the Painting Industry

Students who successfully complete this course receive their photo on a certificate of completion that acknowledges that they have been trained in accordance with the latest safe work practices promulgated and recognized by the U.S Centers for Disease Control (CDC), The National Institute of Health (NIH), United States Environmental Protection Agency and the U.S Occupational Safety and Health Administration (OSHA).

This certification demonstrates to clients, customers, employees and associates a dedicated commitment to their health and safety against the risk of Covid-19

Cornerstone Training Institute is a Federal and State Accredited Training Provider offering recognized certifications in

- NYSDOH Asbestos Health and Safety
- USEPA/USHUD Lead Based Paint Activities
- NYSDOL Accredited Mold Training
- USOSHA Authorized Trainers

Q: What are Covid-19 Painting industry safe work practices?

A: Covid-19 Safe work practices are routine steps and interventions that are done on painting projects to ensure the risk of infectious transmission is reduced and eliminated to the best extent possible.

Q: What is covered in this training?

A: This training follows the latest industry guidelines and specific Governmental regulations (USCDC, USEPA, OSHA, NIH and WHO) on proper contact mitigation, disinfecting and sanitizing, PPE and chemical disinfectant safety. It helps students apply these practices in all painting trade associated activities or whenever an identified risk of covid-19 transmission exists.

Q: Why should I take this training?

A: As many people stay and work at home and distance themselves socially, residential-based services such as painting have become highly scrutinized and, in some cases, canceled entirely. This certification-level training teaches painting professionals the best industry standards of care so that the quality of their work matches the peace of mind of both workers and their valued consumers
