

When ordering Framed Prints, your image file specifications must match your print preferences: orientation (vertical or horizontal), mat option (with mat or without mat) and the correct print size. Use the guide below when sizing and preparing your orders. Be sure to remember:

- Files must be at **300 dpi** at the below **PIXEL WIDTH & PIXEL HEIGHT**
- For color print accuracy retain the **sRGB color profile** when saving your **.JPG file** for printing
- For more detailed instructions visit [Framed Prints FAQ](#) or reach out to us at support@designaglow.com, we are happy to answer any of your questions!
