Developer 1 oz. (30 g/ml)

TECHNIQUES

PHASE ONE

1. Brush through texture first to stretch the hair, making application and sectioning easier. Segment into four parts.
2. Apply Formula 1 to the base in ¼" sections.

TIP: When looking for a brighter, blonder end result in the front, begin at the front hairline. If the nape is significantly darker or resistant, begin application in the back.

3. Process to a level 9 and rinse well. Shampoo with Color Protect® Post Color Shampoo and condition with Forever Blonde® Conditioner.

PHASE TWO

1. Place Formula 1 at the base to give a deeper, beige root, and leave out the front hairline. Once applied to the root on each subsection, apply Formula 2 from the application line down through the ends. Be sure to slightly blend the two for a seamless color melt.

TIP: For curly textures like Devyn's hair, apply Formula 1 at the base and Formula 2 at the mids and ends at the same time for better manageability. For straighter textures, apply at the base all over, then revisit with Formula 2 for mids and ends.

2. Once applied all over, apply Formula 2 to the remaining hairline sections for a brighter result around the face. Process for 25 minutes and rinse well. Shampoo with Color Protect® Post Color Shampoo and condition.
