

HCHT250ST Hollow Cathode Tip

- This hollow cathode tip is commonly used in neutralizer and discharge cathode electron sources with gridded ion sources.
- This HCHT250ST tip is a patent-pending long-life version of our standard HCHT250 tip. Both are otherwise identical in form, fit, and function.
- 1/4 inch tube diameter, 2.054 inch overall length.
- Mid-height heater cable connection.
- Internal patented low work function insert (Pat. No. 10,002,738)
