

Fact Sheet

Vegetable Glycerine

Description: Vegetable Glycerine is powerful humectant, emollient and solvent in cosmetic formulations. It is water soluble and always added to the water phase of formulations.

INCI name: Glycerine

CAS number: 56-81-5

Use: 2-5% and added to the water phase. It is suitable for a wide variety of formulations such as lotions, creams, shampoos, body washes, gels, serums and foaming products.

Vegan: Does not include animal derived ingredients

Why use use glycerine?

- Three in one ingredient – can be used as a humectant, emollient and solvent
- Natural, biodegradable and environmentally friendly
- Controls foam with other high foaming surfactants
- Perfect for natural liquid soaps
- Gentle on skin and hair
