Cross-country MTB rims

MODEL: XC 1025

The high performance XC rim moves to the next level with a fast and light attitude.

Key benefits

- Best in its class alloy XC rim
- ISM4D rim machining reduces weight to close the gap to carbon rims without compromising strength.
- Increased traction and control
- 25mm wide hookless rim profile optimized for lower tire pressures, resulting in improved grip in all conditions. Optimized for modern XC tubeless tires
- Accelerate quicker
- Lighter weight rims result in super low inertia and instant acceleration.

Specifications

Features

- Maxtal
- SUP / Welded
- Single eyelet
- Tubeless Ready (Mavic UST valve recommended - not supplied with the rim)
- S6000 Aluminum

Dimensions

- ETRTO size 29": 622 x 25TSS
- Valve hole diameter: 6.5 mm
- Tubeless tape width: 28mm (not delivered with the rim)
- Recommended rim tape: Mavic UST rim tape (not supplied with the rim)
- Recommended nipple length: 14 mm

Available colors / Versions

- Black 28 holes
- Black 32 holes

Cross-country MTB rims

MODEL: XC 425

The best value fast and light rim gets wider

Offering both lightweight and a wider profile, XC 425 screams fast accelerations and grip in all situations. This sleeved rim offers simplicity and reliability and its hookless profile and tubeless compatibility (thanks to matching tape) enhance tire profile, comfort and puncture protection. Available in 28 and 32 holes, 29" only

Specifications

Features

- Sleeved
- Traditional drilling
- Non eyeleted
- Tubeless Ready (Mavic UST valve recommended - not supplied with the rim)
- Disc
- S6000 Aluminum

Dimensions

- ETRTO size 29": 622 x 25TSS
- Valve hole diameter: 6.5 mm
- Tubeless tape width: 28mm (not delivered with the rim)

Available colours / Versions

- Black 28 holes
- Black 32 holes

Trail MTB rims

MODEL: XM 1030 27.5 and 29

The high-performance trail rim moves to the next level with an agile and versatile attitude.

XM 1030 is the latest version of Mavic "XM" rims, and as such is the most advanced evolution. Offering both light-weight and a wider 30mm profile, this welded rim features ISM 4D technology (Inter Spoke Milling), which strategically removes material from the rim where it's not needed but keeps it around the spokes, where tension is applied. This technology makes the rim lighter, for faster accelerations, without compromising durability.

Optimized up to the limit of material potential, XM 1030 is probably the best alloy Trail rim on the market. Available in 28 and 32 holes, 27,5" and 29".

Key benefits

- Best in its class alloy Trail rim: ISM4D rim machining reduces weight to close the gap to carbon rims without compromising strength.
- Wide 30mm rim for versatility and total riding control : 30mm wide rim is optimized for lower tire pressure, giving you a smoother ride with more traction and control
- Versatile, dynamic trail riding performance: Wide, strong rim profile ready to face any trail

Specifications

Features

- Maxtal
- SUP / Welded
- Traditional drilling
- Single eyelet
- Tubeless Ready (Mavic UST valve recommended - not supplied with the rim)
- S6000 Aluminum

Dimensions

- ETRTO size 650b/27.5": 584 x 30TSS
- ETRTO size 29": 622 x 30TSS
- Valve hole diameter: 6.5 mm
- Tubeless tape width: 35mm (not delivered with the rim)

Available colours / Versions

- Black 28 holes
- Black 32 holes

Trail MTB rims

MODEL: XM 119 Disc

The best value for money on the market

Wide enough to use large volume tyres, and specially designed with the constraint of disc brakes in mind, XM 119 Disc is one of the highest quality entry level rims on the market. Available in 26"/27.5"/29".

Specifications

Features

- 6106 aluminum alloy
- Pinned
- Traditional drilling
- Non eyeleted
- Tube type
- Disc

Dimensions

- ETRTO size 26": 559 x 19C
- ETRTO size 650b/27.5": 584 x 19C
- ETRTO size: 622 x 19C
- Valve hole diameter: 8.5 mm, supplied with valve adapter
- ETRTO recommended tyre sizes: 35 mm to 69 mm (1.3" to 2.7")
- Recommended rim tape 26": 559 x 20 x 0.6
- Recommended nipple length: 12 mm

Available colors / Versions

- Black 32 holes

Gravity MTB rims

MODEL: EX 1028

Designed and engineered for the unique demands of enduro and downhill riding, the EX 1028 delivers a super strong/reliable and yet light package for a perfect custom gravity wheelset.

XM 1030 is the latest version of Mavic gravity rims, and as such is the most strong and durable rim profile ever created.

Offering both lightweight and a wider 28mm profile, this welded rim features a crochet type profile and was designed to absorb big impacts—from hard-hammering rocks to hard landings and big compressions. Optimized up to the limit of material potential, EX 1028 is our premium gravity-oriented rim.

Available in 28 and 32 holes, 27,5" and 29".

Key Benefits

- Hammer through rough terrain with confidence: Wider 28mm (internal) rim is engineered to absorb heavy impacts. Triangular rim shape absorbs heavy impacts so you're free to bomb the descents
- Proven by evidence: Developed, tested and proven to meet the standards of DH racers and ready for hardcore bike park shredders or big mountain enduro riders.
- Increased grip and excellent stability: 28mm wide rim profile is optimized for modern gravity tire

E-Bike MTB rims

MODEL: EXM 430

The entry level E-rim with special features

With a wider 30mm profile and the best combo of light weight and high strength, E-XM 430 is a trustworthy rim for your all-mountain adventures. This sleeved rim is plenty strong, and its PFP [pinch flat prevention] profile and tubeless compatibility (thanks to matching tape) optimize tire profile, comfort and puncture protection. Available with 28 or 32 holes, in 27.5 and 29 inch diameter.

Specifications

Features

- Sleeved
- Traditional drilling
- Non eyeleted
- Tubeless Ready (Mavic UST valve recommended - not supplied with the rim)
- E-Bike specific rim profile
- S6000 Aluminum

Dimensions

Key Technologies

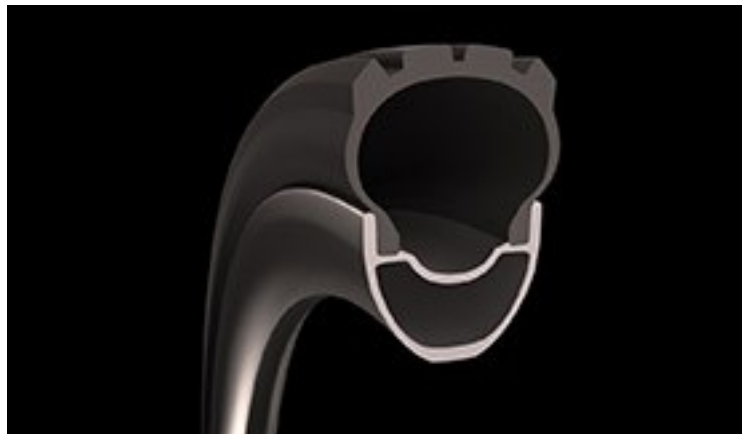

SUP

Stronger and smoother joint Soudé Usiné Process. After bending, the rim joint is arc welded. The welded seam is then milled for a smooth finish.

ISM 4D

Inter Spoke Milling 4 Dimensions An exclusive Mavic patented concept, ISM 4D significantly reduces weight and inertia without compromising durability. Quicker accelerations, better handling and more resistance ; the right mix to make the most of any ride. The smooth profile also helps reducing aerodynamic drag

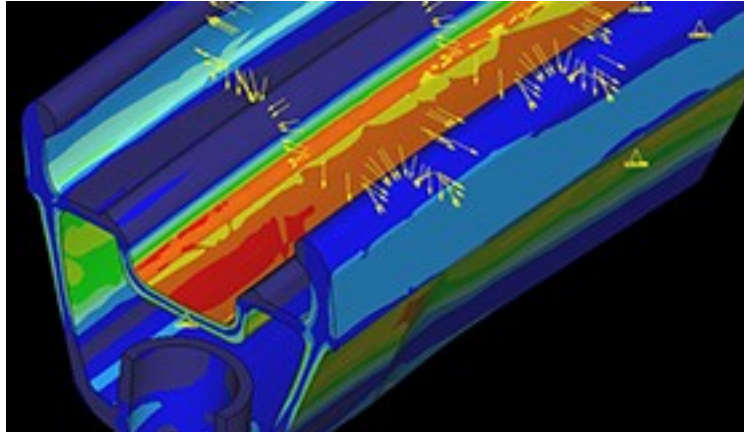

UST

Traction and control Universal Standard for Tubeless. Ready to ride tubeless system. The UST concept improves traction, control and comfort while reducing inertia and flats.

Key Technologies

Maxtal

Light and strong Exclusive to Mavic, this specific aluminium alloy offers a higher strength to weight ratio than conventional 6106 alloy
