

# DNA Evolved Instructions

## Parts of the Pen

## Parts of the Eyedropper

## General Care

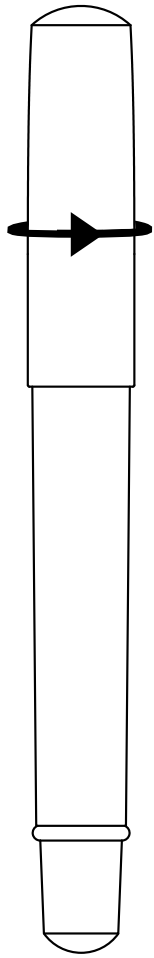

Keep the exterior parts of the pen dry to avoid damage.

Keep the pen away from an ambient temperature greater than 40 °C or 104 °F.

Avoid UV exposure.

Do not let any ink dry inside the pen.

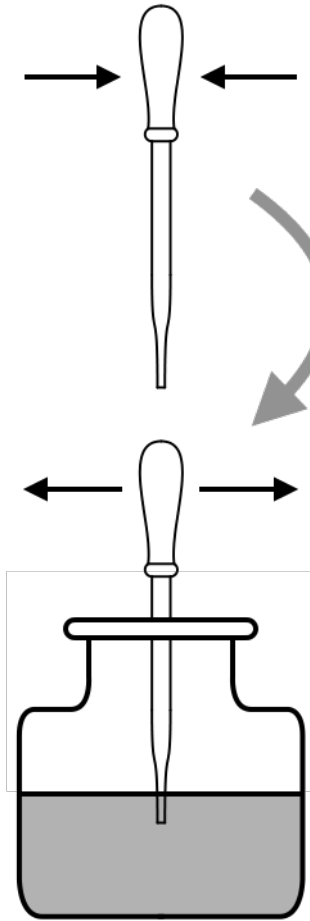

# Inking Instructions

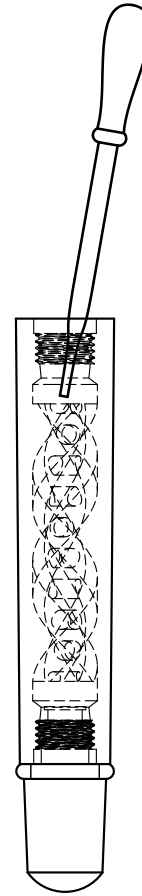

1. Unscrew the cap by twisting it counterclockwise.

2. Unscrew the section by twisting it clockwise.

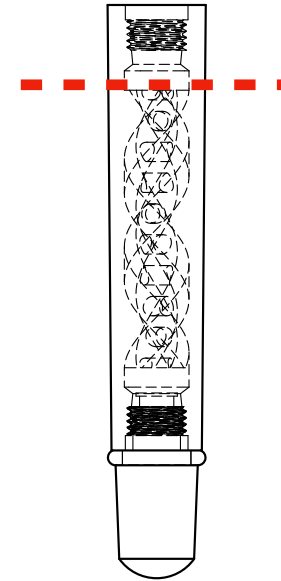

3. Squeeze the bulb of the eyedropper before dipping it in ink. With the tip of the eyedropper submerged, release the bulb to draw the ink up.

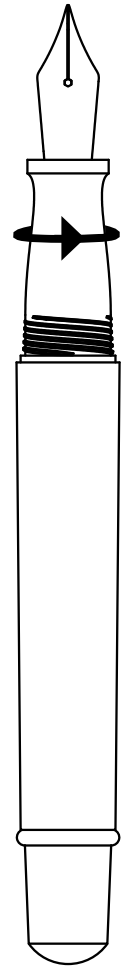

4. With the tip of the eyedropper in the barrel, squeeze the bulb of the eyedropper to deposit the ink inside.

Please only fill the pen from the section side; inking it from the end cap will cause leakage.

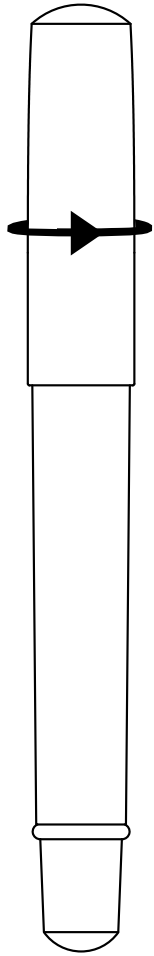

5. Repeat steps three and four until the ink level reaches before the threads.

6. Screw the section back in by twisting it counterclockwise.

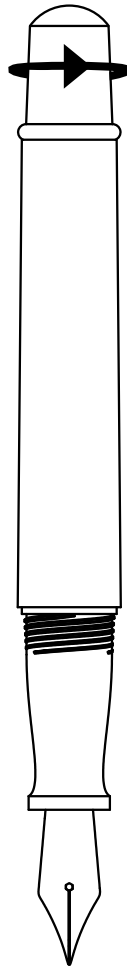

# Washing Instructions

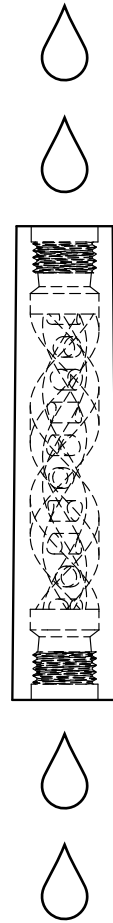

1. Unscrew the cap by twisting it counterclockwise.

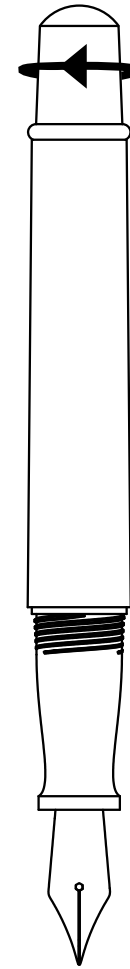

2. Unscrew the section by twisting it clockwise.

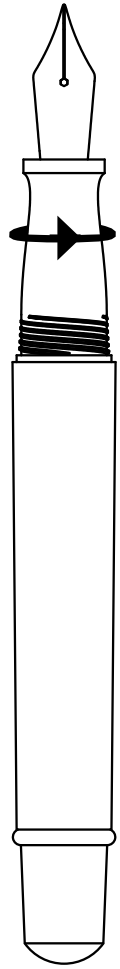

3. Unscrew the end cap by twisting counterclockwise. Note: hold the ring as it will fall out.

4. Rinse the barrel by running water down one end of it.

5. Screw the end cap back by twisting it clockwise.

6. Screw the section back in by twisting it counterclockwise.
