Registered Business Number: 551013

VAT Number: 3371432IH

About Us:

Our History: Biofa Ireland was established in 2015 following the retirement of the owners of the previous business "Biochrome Natural Paints", which operated in Co. Clare since the early 1990s.

Our Eco Business: We distribute Eco-Friendly, Chemical Free and Non-Toxic Natural Paint, Varnish, Undercoat, Oils, Wax and Cleaning Products to customers throughout Ireland and Northern Ireland. All our coloured wall and ceiling paints, coloured wood paint and wood stains are mixed to order and all products are distributed from our mixing/ storage base at our home in Feakle, Co. Clare.

Our Philosophy.....The most environmentally friendly products are those which are beautiful, durable and produced in a responsible and sustainable manner.

Did You Know? A healthy and active lifestyle is not possible without a healthy indoor environment. Foreign substances in the air can cause stress to the human body. This is why Biofa only uses natural and chemical free substances which the human body can process.

Why Choose Us? Biofa's natural products are produced from renewable raw materials obtained in an environmentally friendly manner. No toxic substances or chemicals are utilised in the production process and are therefore both non-toxic and chemical free. All products decompose naturally and discharge no toxic substances into the environment. So all our products are both human and eco-friendly!

We mix to order! Using our mixing machine allows Biofa Ireland deliver reliable and repeatable colours. Some manufacturers of natural paint offer a white base and sell colour pastes or powders for customers to mix the right shade of paint themselves.

At Biofa Ireland we offer a range of natural interior and exterior paint colours that are mixed to order by us in store, so that we can reproduce these colours time and again, to exactly the same shade! This is ideal if you wish to order a natural paint colour in the future that you purchased before.

Mixing in this way not only guarantees the exact colour that you order every time, but because we use three different bases to mix with, we can offer a far greater range of colours than our competitors.

Don't see what you like in our colour range? We can mix most RAL and NCS colours to order – just get in touch!

Quality Standards: Biofa Ireland supplies the highest quality products produced by the Biofa Laboratory in Germany. All products are subject to strict internal Biofa tests and application technology. All products are fully tested by various institutes including The ECO Institut in Cologne, Germany and the TUV Umweltservice (Environmental Service of the German

Technical Inspection Association) test Biofa products for indoor air quality. The results during and after the drying process and the effects on the indoor air quality are decisive. Products are quality checked to DIN or EN standards.
