

STATEMENT ¹⁷

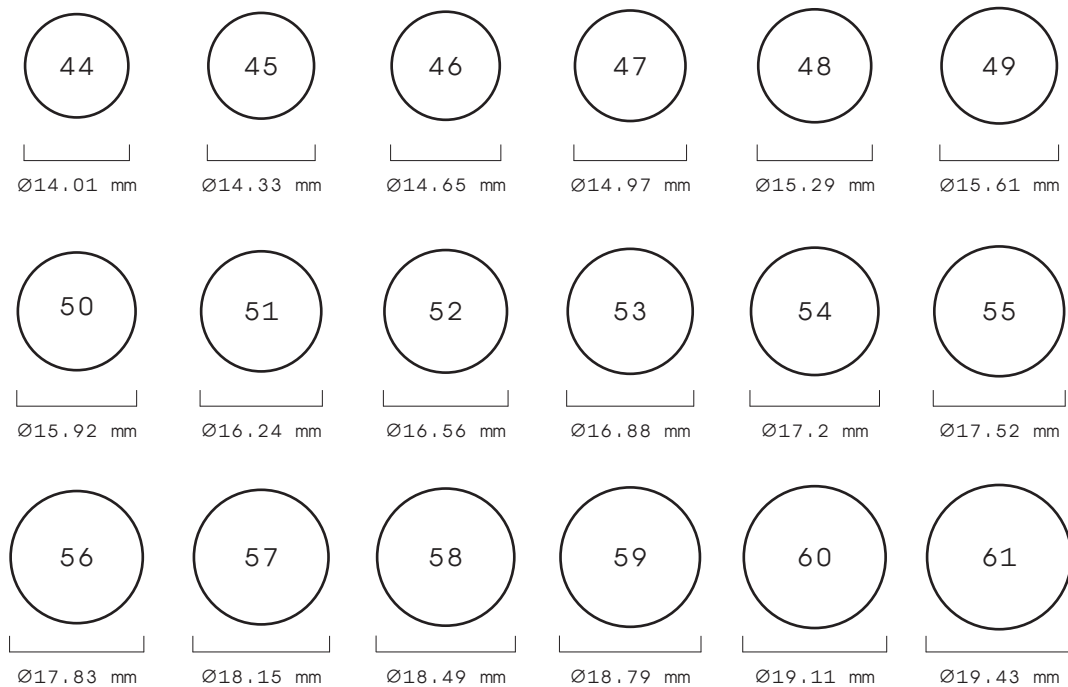

SIZE GUIDE_

Please start by printing this page.

When choosing print options, please ensure that the "scale to paper size" option is not selected. Verify that the sizing chart is accurate by placing a ruler on the scale below. It should have a length of 2 centimeters.

Select a ring that you wear on the same finger of the same hand as the ring you desire. Place the ring on the circles below to determine the one that best matches the ring's size. Once the inside diameter of the ring matches a circle exactly, you have found your size.

Keep in mind that the same finger may vary in size from one hand to the other and that a ring worn on one hand might not fit the other, even if placed on the same finger. Furthermore, we recommend the sizing be done towards the end of the day.
