**HONMA** 

ARMRQ MX BLACK

**ARMRQ MX SHAFTS**

ARMRQ MX shafts are Made in Japan using the highest quality materials at Honma Golf HQ in Sakata. Featuring proprietary designs using NEW 10 Axis Sheet Metal Hybrid Armour Technology (4-Axis Aluminum and 6-Axis Carbon) to deliver Counter-Balance designs for added clubhead speed, along with industry leading Toray Composite M40X and T1100G Carbon.

TECHNOLOGY

**WIDE 3-D L-CUP FACE INSERT**

Featuring a wide L-Cup Design utilizing New Ultra-Thin Face which uses Vertical Slits specifically arranged to improve the strength of the face insert to allow for maximum speed and forgiveness. Coupled with one external and two internal sole slots, as well as a Low-Deep Center of Gravity, BERES Irons are easy to launch high with strong carry distance. An 8620 Forged Body delivers Honma's hallmark feel for the most discerning of players.
